Editorial AS WE SEE IT

The Senate is back in Washington and the House is scheduled to reconvene at the first of next week. The "target date" for adjournment is September 5, which would give the upper House just 28 days (including Sundays) or 29 days if Labor Day is included too, and the lower chamber just 21 or 22 days at work. Yet some rather rash spokesmen for the Democratic party have had the hardihood to assert in effect that the real party platform will be written in Washington during this brief period and a basis laid for the coming Presidential campaign by their candidates. Of course, it is absurd to suppose that anything of the sort could be done in that length of time, or even a period of a week of two longer, unless that platform and that "basis" are to be purely political buncombe intended to give the party some sort of tactical advantage in the struggle for the November votes of the electorate.

Not even the record smashing rate at which Franklin Roosevelt was able to get laws on the statute books in the early weeks of his first Administration approached any such speed as is thus indicated. It would be simply out of the question to get broad constructive legislation formulated and drafted in any such length of timeassuming that the work is to be well done-to say nothing of maneuvering it through a badly divided Congress and to the statute books. And this would be as true of measures carefully designed to achieve ends quite harmful to the country and unworthy of the party as it would be of laws planned for really constructive purposes. Apparently, certain of the party leaders would have us believe that this short period of post-convention work on the part of Congress was carefully planned that way in order to be able to present to the people a dramatic record of achievement directly, or almost so, before the voting is to take place! We doubt if there are many in the land naive enough to take much stock in such yarns as this.

Hazard in Washington

There is, however, hazard for (Continued on page 15)

Balanced Funds Boost Buying; Common Stock Funds Retrench

By A. Wilfred May

Analysis of investment companies' portfolio operations during June quarter's volatile market reveals continued net trend toward buying curtailment; with important exceptions among some balanced funds. Most favored groups included aircrafts, beverages, building, drugs, electronics, fire insurance, utilities, rails, and tobaccos. Somewhat friendlier attitude toward the oils. Textiles widely sold; with some other specified groups eliciting divergent reactions. Most popular issues were North American Aviation and Upjohn. General Telephone & Electronics and RCA most decisively sold. Interest in foreign equities maintained.

Our survey of second quarter portfolio operations by 87 investment companies under 63 managements reveals unprecedented divergence of policy between the several categories.

The general market, as measured by the indexes, in April extended its 1960 decline by about 3%, then rallied by 7% to recoup one-half of the preceding drop from its January all-time high.

The balanced open-end funds, surprisingly in the face of their greater freedom of action, generally displayed the least bearishness. In the second quarter their liquidation of commons declined much more sharply than did their acquisitions.

This "bullishness" marked a reversal of the balanced funds' policy in the first quarter. Their purchases of common stocks exceeded sales by 53.9%, against only 15.8% in the March quarter. Their composite portfolio proportion placed in net cash and government bonds declined by 7%.

and government bonds declined by 7%.

The open-end stock funds, on the other hand, stepped up their selling of commons considerably, with the result here that their buying topped selling by only 19.3%, against 46.7% in first quarter. Finally, the closed-end companies remained highly defensive, with an increased excess of stock sales over purchases.

In line with the foregoing, the number of indi-

[Tables appearing on pages 21 and 27 show Fund's comparative investment positions; total common stock and other securities transactions; and individual common stock transactions by industry groups.]

vidual funds acting as net buyers of commons rose from 17 to 21 among the balanced units; while net sellers declined from 11 to 9. Among the stock funds, net buyers decreased from 30 to 24, whereas net sellers increased from 11 to 14.

In the case of the closed-ends, there were only two net buyers of common, namely Dominick Fund and Niagara Share. Since the end of the third quarter of 1959, the number of net buyers has steadily declined, with a corresponding increase in the number of net sellers.

The redemption record appears to be a mixed one, both as to its broad significance and as to individual funds. While the dollar amount of fund share redemptions, calculated, as widely publicized, in proportion to current sales, during the quarter increased to 44.7% from 35.5% in the first quarter, the proportion of these redemption totals to outstanding share holdings, a more significant statistic, has remained constantly favorable. In fact, calculated in the latter way, they showed but a minute rise during 1960, and an actual decline from the first two quarters of 1959.

STOCK BUYERS

Prominent among the balanced funds which were on the buying side of commons were the four Axe funds, Boston Fund, Broad Street, Eaton & Howard Balanced, General Investors Trust, Investors Mutual, Loomis-Sayles, Massachusetts Life Fund, Mutual Investment, National Securities Income, Stein Roe & Farnham Balanced, and Wellington Fund.

Stock funds which bought equities on balance were Blue Ridge, Bullock, de Vegh Mutual, Dreyfus, Eaton & Howard Stock, (Continued on page 20)

fering a long-term decline. But sales of replacement parts are dependent upon the number and age of implements in use. Thanks to growth record can be claimed by Tractor Supply Company, listed on the New York Stock Exchange. quartered Tractor Supply Com- in future years. pany supplies thousands of new farm equipment replacement parts and accessories through 48 retail outlets and a nationallydistributed mail order catalog.

Since its founding in 1939, the firm has chalked up an unbroken record of sustained growth in annual profits. In the past five years alone, the company has increased sales 129%, boosting net still higher to nearly 3½ times the 1955 level.

In the fiscal year ending Oct. 31, 1959, sales totalled \$10,404,000. The company has forecast earnings of "at least" \$1.65 for the current fiscal year, compared with \$1.51 in the previous 12 months. Sales should total close to \$12 ings and sales.

TSC management points out pleasure to there are but two alternatives in write about making a replacement part: du- Morningstarplicate or make better. buying from cost-conscious suppliers, elimination of middlemen, and frequent supplier-to-store vestment possibilities can be shipments to minimize warehousfound outside the high-glamour ing costs, Tractor Supply is able customers while enjoying a healthy margin. The company retails parts of at least comparable quality at up to 40% less than the list price of manufacturers' dealers.

Several mehods of boosting both volume and income, currently parts of TSC's long-range expansion program:

(1) Broadening of Product Line. Initially TSC sales consisted largely of parts and attachments for tractors; today, such sales account for less than half of volume. Within the last year, four pages of hay baler parts have been added to the firm's catalog, and expansion in the combine line has been even greater.

This month, Tractor Supply anthis distinction, an outstanding nounced acquisition of Spindle Specialty Company, manufacturer of the patented Lindsay Hi-Barb spindle for cotton pickers. > outlets marking TSC's entry into the nation's leading agricultural state, California.

> (3) Establishment of Credit Sales. With farming becoming more "big business" minded, the place of credit selling on the agricultural scene is gaining. Earlier this year, TSC initiated credit sales on a trial basis on 10 of its 48 stores. While this volume is still small in dollars and cents, new accounts are being added daily. The firm's store managers conservatively estimate a substantial gain in volume will result from this change in the company's long-established cash-only policy.

The firm's business ratio is a comfortable 3.5 to 1. Selling around 26, TSC stock stands at about 16 times earnings. The regular annual dividend is \$1. TSC enjoys a high pre-tax profit margin (23.6% in fiscal 1959) and, since its large volume can be supported with relatively little capital, shows a 27.5% return on investment.

To my mind, Tractor Supply (2) Opening of Additional Out- should prove of interest in investors looking for that all-too-rare has already added six in the cur- combination of growth and reces-

as compared to only \$18 a share for Morningstar-Paisley. It seems to me that this price discrepancy cannot continue to exist and that the price of Morningstar-Paisley stock will increase; the price increase will be caused by (1) continued growth of earnings and (2) recognition by investors. This should give the stock a higher price-times-earnings ratio.

Besides increasing sales and earnings, the company is making every effort to continue to improve its profit margin. This is especially important; for, since there are only 500,368 shares out-standing, any increase in profit margin will significantly increase share earnings.

The scope of the company's products is unlimited; they are used in such industries as the food, clothing, building, pharmaceutical, entertainment, and educational industries. About half the company's adhesives are sold, for example, to the packaging and paper industries, which, according to Barron's consume more than \$100 million worth of glues a year. The Morningstar division manufactures starch products (into \$199.50, a small fraction of the consecutive year and earnings for cluding dextrines), gums, and dry adhesives, power and economy to meet pres- about \$1.50 to \$1.60 a share; yet, polyvinyl acetates, latex compounds, and plastisols. Can We Play the Dollar Exchange Standard Game =

By Max J. Wasserman, Visiting Professor, The William Andrew Patterson School of Diplomacy & International Commerce, University of Kentucky

Commendatory assessment of our "planned" deficit in the balance of payments describes our role, as the world's banker, under the evolving "dollar exchange standard" and its concomitant rules of the game. The shift of American investments abroad is construed to be of greater significance to our economy than the current deficits in our balance of payment-viz., it will bring about an international levelling of factor earnings (profits, wages and interest) not achieved by international trade, and will lower U. S. exports and raise investment income inflow. Professor Wasserman indicates why schemes to reduce our imports would not be helpful; warns against our taking unilateral action in the area of international economic relation; depicts the risks facing us as analagous to those facing a local banker; and finds here a challenging, rewarding assignment deserving the thoughtful attention of all businessmen.

A large bourbon whiskey dis- be worthwhile to note that our tilling firm produced a wide Russian Allies received about \$11 variety of whiskies of various billion of this total. After VE day,

whiskey for just about every bourbon taste and pocketbook. In a recent advertising campaign, the displays and copy featured the more expensive whiskies distilled by the

After the advertising campaign was

over, the President of the firm was having lunch with an old friend. "How did your advertising campaign go?" asked the friend. "It went splendidly," replied the President, "we couldn't have asked for better results. We tripled the sales of our cheaper whiskies."

Max J. Wasserman

"But I thought that your campaign stressed your more expensive whiskies," countered the friend. "Yes, I know," replied the President, "the sales of the expensive whiskies did not increase but the cheaper ones did. You know, we planned it that way."

We planned it that way! Such is the reply advanced by many when the results of an action appear unusual or startling. And often the reply is factually accurate for surprising results often flow from simple and direct actions.

Well, the United States has been running a deficit on its balance of payments for a number of years now and, believe it or not, we planned it that way. The heavy economic and military aid programs-which have been running at the rate of \$3 to \$4 billion a year — have made the deficit inevitable. This result has been deliberate ever since the inception of the Marshall Plan in 1947.

Extent of the Balance of **Payments Deficits**

We are all aware that World War II was largely financed by Lend-Lease. During that conflict, we supplied our Allies with about various foreign countries amount-\$41 billion worth of goods and ing to about \$60 billion. The difservices. And, in passing, it might

proofs and ages; the firm made a President Truman put an abrupt end to Lend-Lease.

In many ways, President Truman's action was premature. The need of our Allies did not end with the closing of hostilities. Some of them had suffered extensive bombing damages. Most of them had but little output available for export and all of them needed large amounts of imports. The international reserves of the Allies were all but exhausted. Such nations were very poor customers for the products of our industrial machine, unreliable sources of supply, unstable allies and, finally, international communism was knocking at their basement doors and demanding admittance.

Under the Marshall Plan, its predecessor and successor plans as well as its cousin programs, the United States has provided other nations, through loans and grants, a total of almost \$75 billion to - about 80% in grants date or gifts and 20% in credits or loans. This total amounts to approximately 171/2% of the national income of the American people for 1959 or the income of all Americans for over two months at current rates. It would meet the expenditures of our military establishment for almost two

In spite of this aid, foreign nations ran a deficit on their balance of payments amounting, from 1946 to 1949, to \$7.1 billion and this deficit was taken out of their holdings of gold and United States dollars, still further reducing their international reserves. Beginning in 1950, however, the foreign nation's deficits ceased, they earned surpluses and the United States, in its turn, started to run a deficit on its balance of payment. From 1950 through 1959, it is estimated that this total deficit amounted to about \$21 billion. For the period 1949-1959 as a whole, the net cumulative deficit on the United States balance of payments was approximately \$14.2 billion.

During this period, the United States made grants, as gifts, to various foreign countries amount-Continued on page 28

Rexall Drug & Chemical Co.

By Dr. Ira U. Cobleigh, Enterprise Economist

Documenting a profitable swing from retail to manufacturing.

corporation is to make money; children. Rexall Laboratories are and, in general, the more money a company can make on each dol- of total company net profits. lar of sales, and on each dollar of invested capital, the better that is centered in the Riker Laboracompany does for its stockhold- tories Division, established 11 company does for its stockholders. Operating on this fundamental logic Rexall Drug & chemical Co. has demonstrated that, by smart management, by winnowing out less profitable operations and by adding new high profit lines, you don't need the profit lines, you don't need the profit lines, you don't need to ries in lyfo for about 30,000 shares of Rexall common. Darwin specializes in glandular extracts and heparin. In June, Schen Labs big increases in gross businesss to double your profit. To illustrate, from Schenley Industries in ex-for 1953 Rexall sales were \$189.2 change for 120,000 shares of Rexall million and the net profit per common. These added properties share was 90c; for 1958 sales were will ultimately be integrated with

Obviously a company that can and have a pretty good idea as to where it is going. Rexall does. It has been reducing its own retail profitable manufacturing

Vast Retail Outlets

Everyone thinks of Rexall as a nationwide retail drug chain. In essence it is, but instead of extensively owning and operating its own stores, Rexall Drug now has over 11,500 independently owned but franchised drug stores as outlets for its myriad lines of drugs, toiletries, cosmetics, hosucts. Totally, this franchised chain did, in 1959, about 25% of all the nation's retail drug business. Having such a huge and fabulous "captive" market at its disposal the Rexall management has sought to expand the number, the variety and the profitability of the items it can merchandise through this comprehensive network. Therein lies the formula for

Six Fold Diversification

Actually Rexall Drug is made chemicals.

Taking them up in order, the company's owned chain of retail stores has now been reduced to about 170 units operating under the Liggett and Owl names. Retail stores account for around 13% of profits; and expansion of this division seems unlikely since capwarding returns.

The Rexall Laboratories in St. recently enlarged and

The basic purpose of the business Jr." a vitamin concentrate for believed to account for about 35%

These are nationally advertised forces with a large consumer of ling to an announcement made by in our economic picture. The Harris Bank periodical states that both employment and unemployment forces with a large consumer of ling to an announcement made by in our economic picture. The Harris Bank periodical states that both employment and unemployment increased more than season-ally in June due to a record influence of the season-ally influence of the seaso and sold under the Rexall Trade in 1958 in the formation of a poly- investment companies, Financial Marks. They include quality items styrene enterprise, Seamco Chemwith high profit margins and ical Co. to operate a 10 million Industrial Income Fund, Inc. FIF heavily promoted proprietary pound capacity polymer plant. By Associates, Inc. is the organization drugs such as "Plenaming" "Cough 1961 the capacity of this company Center" tablets and "Meltamins will have been increased seven-

fold. On April 29, 1960, Rexall formed a second joint venture with El Paso Natural Gas—a \$70 million new plant to be built at Odessa, Texas. With the required petrochemical raw materials at hand, this new property will have an annual polymer capacity, by 1965, of 200 million pounds. It will be a huge complex converting natural gas into the finished polyethylene, polystyrene, and poly-propylene products. All of which assures Rexall of a magnificent (and profit laden) supply of raw materials for its steadily expanding plastic manufactures.

There are other smaller affiliate companies which we need not dilate upon, and there are substantial overseas manufacturing facilities, but we've outlined the main panorama of progress at Rexall—expanding capacities in many areas that set the stage for rising profitability.

For 1959, net sales of Rexall were at an all time high — \$227 million. Net earnings were also at an all time high, \$8,753,000 equal to \$2.30 on the 3,832,639 common shares outstanding. Ahead of the common is \$30 million in long term debt. Current position is excellent with about \$65 million in net working capital at the 1959

vear-end.

For 1960 and beyond the Rexall vista appears bright. Earnings for 1960 should rise to around \$2.45 and, by 1965, giving effect to full profit margins in this division are stream production in the petrosteadily increasing the import-chemical division, earnings of ance of ethical drugs to Rexall's \$4.75 to \$5 have been projected. by competent analysts. There is ample evidence that Rexall is moving steadily forward as a balanced plastic, pharmaceutical and chemical enterprise of major stature. The common at 48 with a 50c dividend has a forward look

late some hedge buying.

Last week, steel mills operated at 55% of capacity, two points above the previous week. Output: 1,570,000 ingot tons.

inched upward again for the third week in a row. Most of the increase in Steel's price composite, up 17 cents to \$32, was accounted area. Prices in most districts, depth of the expected auto upturn. of New Deal it is widely assumed would be affected by it together however, remained steady.

metalworking firms is likely to continue for the rest of the year, This includes model runouts of Steel commented in its analysis of profit reports for the first half, 1960. Sales have not lived up to 1961 lines, particularly General of capital expenditure and a lower to be devalued. Possibly one of earlier expectations and the costs Motors products, are now taking of doing business are rising.

Labor and other costs for most firms have gone up or will increase this year. Aluminum Co. of America, for example, increased the price on most mill products 0.5 to 0.75 cent last week.

Other factors likely to hold profit margins down: Continued buildup of foreign competition, level attention. metal firms are still budgeting substantial sums for new equipment and plant modernization in an effort to increase efficiency.

Better Steel Demand Seen

New orders for steel are having trouble getting over the 50% capacity rate, The Iron Age reports.

The national metalworking weekly says that the August improvement is less than expected, and far from encouraging to steelmakers. The best that can be said is that business has passed the low point.

But the magazine reports a

14 WALL STREET

minor, developments in the steel Actual orders on the books business that indicate the market

Here are some of the points

(1) There has been a slight pickup in orders. The gain, although a small one, has raised the order rate to something around 50% of capacity.

(2) The order pickup is pretty much offset by the running out of old commitments. Backlogs are

(3) New orders are mostly for time the order is placed until the quick delivery. The volume of steel is delivered," Steel fore- rush business is increasing. Even-casted. "With it will come the tually, it may reach the point cessation of inventory cutting, where mills cannot fill all demands for fast delivery. However, The inventory buildup will not mill inventories of semi-finished be large. Most manufacturers will are heavy, and the breaking point

(4) Forward buying is very activity picks up, inventories will light. September orders of one gradually increase. Toward year- mill are less than the same mill end, the possibility of higher steel had 30 days ago. Mills do not exprices, when the steelworkers get pect forward booking to increase the wage increase called for under until the limits of rush delivery are reached.

(5) Flat-rolled business is relatively good. For both July and August, one typical mill is shipping cold-rolled sheet at a rate equal to 60 to 70% of capacity. Scrap prices, a bellwether of Galvanized is even stronger. Hotthe steel industry's operating rate, rolled is down, and tinplate is becoming a question mark.

automakers' steel needs are up in cause, following immediately on If as a result of a devaluation the the air. Fear Another Dollar Scare Caused by Coming Election Paine, Webber Co.

By Paul Einzig

An earnestly strong plea is made urging the United States and the Free World to avoid a dollar scare between now and our Presidential election. Fearful of what Russia would do if it could engineer or profit from - a major dollar scare, Dr. Einzig asks: (1) Presidential candidate Kennedy to end misgivings about his economic views held in the foreign exchange market by declaring he does no favor a change in the dollar price of gold; (2) Western Governments to abstain from converting dollars into gold; and (3) American labor to cease wage inflation activities. There's nothing inherently unsound here, and were it not for the Presidential Elections we would not have to prove our determination to defend the dollar's gold parity, Dr. Einzig adds.

LONDON, England - There are the International Monetary Fund, indications that the Foreign Ex- to re-lend to the United States change markets expect another any addition to their gold and doldollar scare to develop between lar reserves they would receive now and the Presidential Election. during this period. pikes are in various stages of planning and study. Okiahoma has plans to sell late this fall bonds to finance construction of a southwestern Turnpike of about 85 miles. This turnpike would connect Oklahoma City and the Turner Turnpike with Wichita Falis, Texas. Cost of this project has not yet been announced.

The Commonwealth of Kentucky is planning two turnpikes miles east from Elizabethtown to Princeton and opening access to Western Kentucky. The other proposed Pike would be in the eastern section of the state between Winchester and Campton, a distance of about 45 miles.

These proposed roads have in tion is not along the Interstate Also on Tuesday the City of system route and will not have of Oklahoma, the passage of a law allowing certain portions of the gas tax for making up defideposits instead of today's 2%, as new type of bond also came to ciencies in interest payments and part of their required reserves. market on Tuesday. Not Much on Pending Awards Calendar

The new issue calendar for the coming week is of little imporof importance. On Aug. 17, the State of California will receive provement (1965-1990) bonds. This issue was originally scheduled for sale on June 28, and at that time the bid was rejected It appears as though this rejecexpected that the state will receive a much better bid for their bonds this time.

There have been no important additions to the new issue calendar and highly competitive bidding for the few new issues up for sale should continue.

Life Insurance Investing a Dynamic Force in Economy

By Victor B. Gerard,* Vice-President & Treasurer. Commonwealth Life Insurance Co., Louisville, Ky.

"A new day has dawned for life insurance" and among the reasons ascribed to this is the growing attractiveness of this savingsprotection medium. Mr. Garard explains that it is not solely dua to the returning faith in the dollar's purchasing power but that it is also due to the higher interest rate level which permits insurance to compete with other forms of savings. The insurance executive comments on the necessity of life insurance in today's economy, the contribution insurance makes to economic growth, and on the limited role well selected stocks can play in an insurance company's assets.

surance in the United States are available to pay for groceries, for most frequently traced to the first rent, for the education of the

tion for Relief of Poor and Distressed Presbyterian Ministers, actually by 1860 — or 101 years later— the total amount of life insurance force was only \$200 million. Contrast this figure of 100 years ago with

How Insurance Aids Growth

How does life insurance investing accomplish this feat?

First we must understand how the life insurance business accumulates the funds which it has available for investment. Many years ago a skillful actuary devised a plan to encourage people to continue their insurance as they grow older. In essence this planwhich is called the "level premium payment plan"-requires a person to pay more in the earlier years to satisfy the installments on the than it costs to insure him against television set and the automobile, the hazard of death. These surplus but for rent and for food. Who funds are held by the insurance today has close relatives on a farm company and are applied in later with whom it is possible to live years to eliminate the necessity if the going gets rough in the city? of increasing premiums when the To protect our loved ones it has insured is older and the chances become necessary to create an of his dving are greater. Unemployment Insurance Systems Need Restudy

By William Haber,* Professor of Economics, The University of Michigan, Ann Arbor, Mich.

Economist butresses plea for Presidential Commission to appraise our unemployment insurance system with labor and management criticisms of our Depression-framed system. Taking Michigan as an example of what our insurance fund is not designed to do, Professor Haber suggests we not tinker with the system but that, instead, it be submitted to a searching, objective reappraisal.

gram is 25 years old. It has ex- unemployment; after the 1954 repanded rapidly, and now provides cession, we had 4% average un-

unemployment to 46 million wage earners. Nearly \$25,000,000 has been disbursed in jobless benefits during the benefits quarter - century; over \$4,-500,000 during the 1958 recession. While the unemployment insurance system has al-

William Haber

most universal acceptance, there is widespread dissatisfaction and criticism.

Labor and Management Criticism

efits are too low, providing only about one-third of the wage loss incurred by unemployed wage ance costs and the straitened conearners in 1959, compared to about one-half of such wage loss in surance fund already represent a 1940. The duration of benefits is considered by many as too short; state. over 2,500,000 wage earners exhausted their benefit rights while still unemployed in the 1958 recession. The conditions of eligibility are considered by many students as too tight; and too many workers are improperly disqualified from benefit rights altogether.

Management is also unhappy with the program. It complains that the costs are too high and that in certain states like Michigan, unemployment insurance costs represent so large a burden that it results in unfavorable consequences to employers because of interstate competition. Many employers feel that too many get too much for too long. And others urge that not enough attention is urge that not enough attention is with in the piecemeal fashion of being given to the stabilization of recent years. The issues of dura-employment, with far too much tion of benefits, and their weekly emphasis on the payment of bene-

working forces leaving to ness the insurance fund the responsibility of meeting — in part — the cause of layoffs. Freedom to make viding reasonably adequate protection against catastrophic economic loss suffered by those who are displaced.

Can It Cope With Growing Unemployment?

The unemployment insurance system now operating in 50 states and the District of Columbia was framed during the Depression. It needs to be re-examined in the light of conditions of the 1950's and the decade of the 1960's. Unemployment appears to be a more entered the recovery period after John L. Gwynn, treasurer.

Our employment insurance pro- the 1949 recession with 3% average protection in case of involuntary employment. And now, after the 1958 recession, we appear to be accommodating ourselves to 5% average unemployment. The end of the next recession, which all too many expect in late 1961 or 1962, and one definitely appears to be in the making, is likely to leave us with 6% or 7% unemproblems. Nor is it capable of mind as to ho doing the job which must be done fiction or fact. in areas of persistent and substantial hard-core joblessness. There are too many such areas of economic distress due to the decline of industry or other basic economic changes.

Savings Banks Problems in The United States Today

By Kilgore Macfarlane, Jr. * President, Buffalo Savings Bank, Buffalo, N. Y.

The increasing competition facing mutual savings banks when viewed, particularly, in the light of the continual aggressive competition of S & L Associations, requires building greater earning power and emphasis on services. In answer to his observation, Mr. Macfarlane scans the possibility of savings contracts and adjustments in investment policy. Taking up still more important problems, the Buffalo banker deals with the tax and direct monetary controls proposals being pressed against mutuals, and the essentiality of extending this form of banking to encourage thrift everywhere.

United States is confronted by United States, savings banks have problems more complex and chal- survived wars, depressions and lenging than any it has faced in financial panics in the course of

Competition and the Changing Pattern of Savings

Recent cyclical changes in deposit activity have dramatized the rently exploring the possibility of ability and willingness of individuals to shift among different, competing forms of savings. They also different from the regular savings competition for the savings of the American people in which savings banks are pitted against a variety of other thrift media. Changes in and the vigorous competition among various thrift media seeking to serve them may be even more clearly seen in broad changes during the postwar period in various categories of financial assets held by the people. When we examine these changes, we see mainly savings held in commerthe period 1947-1959, much less percentage-wise than private pen-

> Within the field of thrift account for 22%, while savings and maining 3%

The decline in the relative importance of mutual savings accounts in the field of thrift accounts can be largely explained by the fact that savings banks are presently confined to sections of the country where population and income have grown relatively slowly. This is not the only reason, as indicated by the fact that sav-

If savings banks are to reverse gressive competition, they must increase the attractiveness of existing services to savers. In parearning power through appropriate adjustments in investment policy. Increased earning power will enable them to pay higher providing adequately for the safety of deposits. They should seek also to adopt new services to meet the continual change in individuals' financial needs and preferences. The industry is curadopting new types of savings contracts, which would be quite have highlighted the vigorous account traditionally offered by savings banks.

The Tax Controversy

One of the most complex probsavings behavior of individuals lems confronting the mutual savings banking industry is that of taxation. Proposals for changes in the federal income tax law have been made by commercial bank groups that would greatly increase taxes paid by mutual savings banks and savings and loan assothat thrift accounts, which include ciations, while substantially reducing taxes paid by commercial cial banks, mutual savings banks banks. These proposals, if enacted and savings and loan associations, by the Congress, would compel increased by about 150% during mutual thrift institutions to rethe period 1947 1950 duce rates of return paid to savers and necessary additions to protecsion funds and the market value tive reserves. Although it is genof corporate stock and investment erally considered unlikely that the company shares, but substantially Congress will give serious conmore than other types of savings, sideration to proposals for increased taxation of mutual thrift institutions this year, there is the While it is hazardous to project possibility of tax legislation at

Improving Future Outlook Of Local Transport Carriers

By Hon. Alan S. Boyd,* Member, Civil Aeronautics Board, Washington, D. C.

Local airline carriers are put on notice that class rates will begin January 1, 1961. CAB head terms subsidies an Achille's heel, comments on the inadequate factual knowledge about subsidies, and looks to class rates to diminish markedly the debate on disallowances of claimed expenses and costs. Mr. Boyd reviews the criteria that will determine when service should and should not be discontinued, criticizes in general shortcomings of local air service, and recommends that the industry institute a public relations program to publicize the facts regarding problems and to gain public support.

for some time the main concern

regulation will continue to be the level of direct subsidy payments. Subsidy is provided to the locals by Congress to assure the maintenance and development of services which meet the public interest in and need for air transporta-

Political Parlor Magic Can Produce No Real Growth

By Hon. Frederick H. Mueller,* Secretary of Commerce, Washington, D. C.

Administration's spokesman contends we are at the "very pinnacle of power" and we are "moving forward with the greatest growth potential of all time" so long as we keep "professional defeatism" and "professional radicalism" from succeeding into government. Mr. Mueller warns that with their entry into government our Federal Reserve will lose its independence, runaway inflation will resume, government spending will surge forward and private industry will again become the number one target. Sketched briefly are the truths about our progress as Mr. Mueller sees it in a plea that we not shut off the "generative force of our marvelous growth." Growth is not the exclusive province of left-wing economists, he adds, in comparing what free enterprise can do as against the prospects offered by "defeatism and radicalism."

The profit incentive has created respect for the contribution of the economic foundation of Ameri- business to our fabulous standard ca's survival in this war-torn cen- of living. tury. It certainly helped build

the West. Private competitiveenterprise also assures the best guarantee of our country's progress in the years of terrible hazards and limitless opportunities that stretch ahead.

What is the situation right now?

Frederick H. Mueller The carping critics who are downgrading our country are wrong. The unbiased evidence clearly proves that today the United States is first in military might - first in economic power—first in moral leadership. We have the best chance on earth to maintain this supremacy.

Only our own lack of effort, lack of vision or lack of guts ever can topple us to second place. Only deluded fault-finders ever could appraise the whole picture and still complain that America is on the skids.

Yet right now - when the United States is at the very pinnacle of power and is moving forward with the greatest growth potential of all time-two handicaps to progress are in the way.

Labels Critics-Defeatists and Radicals

These obstacles are the mobilized forces of professioanl defeatism and professional radicalism. These misguided pseudo - economist could become more dangerous to American supremacy than overseas threats, blackmail or trade wars.

The professional defeatists are those blindfolded pessimists, who fail to appreciate the American economic miracle. They are the than 10% of the globe's populafaint-hearts, who wail that America is a second rate power. They sumes a third of the world's goods include those whose initial reac- and services. Channing Corp. **Elects Officers**

George Carleton, Jr., President of Channing Corporation, 85 Broad Street, New York City, a holding and operating company with fi-

nancial subsidiaries supervising eight United States and Canadian mutual funds; insurance companies, and a ball-bearing manufacturing division, has announced the election of three officers to key sales positions.

King Merritt, a veteran of many years of distributing mutual funds, was elected Channing Vice-President - Sales Financial Division, and Chairman of King Merritt & Co. Inc. and King Merritt & Co. (Canada), Ltd., principal distributors of shares of the Channing group of mutual funds. Formerly President of both King Merritt sales companies, Mr. Merritt is also a director of Channing Corp.

H. Louis Jamieson, previously Vice-President of King Merritt & Co. Inc., was named President of that affiliate. Mr. Jamieson is also President of Hare's, Ltd., a subsidiary underwriting shares of Channing's mutual funds. He was Founder and President of his own West Coast retailing firm, H. L. Jamieson & Co., which was merged with Channing Corp. in

Ira Van Vogt was elected President of King Merritt & Co. (Canada) Ltd., with headquarters in Montreal. Mr. Van Vogt has been with King Merritt & Co. in Canada since 1956 as Eastern Sales Manager and Executive Vice-President. Prior to joining the Channing organization, he was manager in the Maritime Provinces for Investors Syndicate of Canada. He is a native of Winnipeg, Ontario.

This Week — Bank Stocks

BANK GROWTH VIA LOWER RESERVES AND MERGERS

Announcement this week by the Federal Reserve Board that bank reserves will be lowered accomplishes further the objectives of the Vault Cash-Bank Reserves Law passed in July, 1959. In order to allow the proper growth of the economy, money supply must of necessity be increased over the long term. It appears likely that reserve requirements will need to be lowered rather than raised over the years.

The step to increase the banking system's lending power will reduce required reserves of Central Reserve Cities (New York and Chicago), now 18% of net demand deposits, to 171/2% effective Sept. 1. The differential between reserve requirements of Central Reserve and Reserve City banks is thereby reduced to one percentage point; the differential must be eliminated by July 28, 1962. Also on Sept. 1, Reserve City and Central Reserve City banks will be allowed to count vault cash in excess of 1% of their net demand deposits, instead of the present 2%. Country banks will be permitted to count as reserves their vault cash in excess of 21/2% of net demand deposits, effective Aug. 25; the present limit is 4%

Growth via acquisitions continues to characterize our banking system. Although branch banking greatly aids bank deposit. growth, significant gains over a short time are infrequent due to the many limitations to branch expansion. Among the exceptions is the Union Bank of Los Angeles which was able to increase its deposits by 19% during the past 12 month period. As the economy grows bigger its credit needs grow larger. Bank growth and growth in earnings come from increases in deposits which in turn provide credit for local, national and world-wide demand

Well over sixty bank mergers have occurred in each of the past several years among our major banks. Yet even today only eleven states have at least three banks among the 100 largest in the nation; twenty-three states have no leading banks at all. Small banks frequently are unable to supply the credit needs of growing industry in their localities. The trend toward larger banks not only is competitively sound but economically sound as well. Generally, the larger the bank the greater the interest by the investing public since equity participation depends on the accessibility of common stock.

The table presented includes eight major bank mergers during the past 12 month period-June 30, 1959 through June 30, 1960.

*Millions of dollars. ‡June 30, 1960 over June 30, 1959.

Chemical Bank New York Trust Company results from the merger of Chemical Corn Exchange Bank and New York Trust Co. in September, 1959. Third largest in New York City and fourth largest in the nation, over 100 offices are operated for a well balanced wholesale-retail bank. On June 30 total assets were \$4.1 billion and loans totaled \$2.3 billion. Further expansion steps include applications for six branches in Nassau County and four offices in Westchester County.

Wells Fargo Bank American Trust Company results from American Trust merging with Wells Fargo Bank in March, 1960. Its 120 offices blanket Northern California and the consolidation strengthens competitive position as the third largest bank in California and a well balanced trust business has been achieved. On June 30, total assets were over \$2.5 billion and loans were \$1.4 billion. The merger of Northern Counties Bank, Marysville Calif. (\$15 million in deposits) is pending.

Pittsburgh National Bank is the result of the consolidation of Peoples First National Bank & Trust Co. and Fidelity Trust Co. in September, 1959. Over 50 offices are operated in Pittsburgh and outlying communities. On June 30, 1960 total resources were \$961.8 million and loans totaled \$463.4 million. A two-for-one stock split was effected in July, 1960 and the annual dividend rate was increased from \$1.40 to \$1.50.

Wachovia Bank & Trust Company, based at Winston-Salem, North Carolina, is the largest bank in the Southeast. In May, 1960, it merged Guaranty Bank & Trust Co., Greenville (\$45 million deposits). Total assets were \$623.5 million on June 30 and loans totaled \$316.1 million. The bank recently established an international department. This state-wide bank has over 60 offices to serve the strong industrial growth and diversified agricultural needs of North Carolina.

American Fletcher National Bank and Trust Company merged Fidelity Bank & Trust Co., Indianapolis (deposits, \$90 million) in July, 1959. It presently is the largest bank in Indiana and has over 45 offices in downtown Indianapolis and neighboring areas. A rights offering of 226,604 common shares was executed in April. 1960. Total resources on June 30 were \$508.6 million and loans were \$204.4 million.

Meadow Brock National Bank of Nassau County, second largest bank in this Long Island county, merged Central Bank & Trust Co., West Hempstead in November, 1959. Known for its rapid growth in retail banking, 40 branches presently are operated. On June 30, total assets were \$461.8 million and loans were \$273.4 million. A second 2% stock dividend during 1960 was paid

North Carclina National Bank is the result of a merger of American Commercial Bank, Charlotte and Security National

Bank, Greensboro in June, 1960. Presently the fourth largest bank in the Southeast, 41 branches are operated in eight North Carolina cities. A large volume of correspondent bank business is conducted. On June 30, assets totaled \$458 million and loans were \$226.2 million. Dual headquarters have been established in Charlotte and Greensboro.

Baltimore National Bank represents the consolidation of Fidelity-Baltimore National Bank and Maryland Trust Co. in June, 1960. Now the largest bank in Maryland, it has the most extensive branch system in the state with 34 offices covering the greater Baltimore trading area. On June 30, total assets were \$433.6 million and total loans were \$173.1 million. The bank now ranks among the top 75 commercial banks in the nation.

Over a dozen mergers have been made effective since the passage of the new U.S. merger law in May, 1960, thus this legislation for more orderly acquisitions in the banking field is not expected to stifle bank merger progress. As more banks increase their size, an eventual wider distribution of ownership and a broadening of the market for the banks' shares will result in additional bank stock investment opportunities.

Political Parlor Magic Can Produce No Real Growth

the country in the situation as it has developed and is developing. There is every reason to expect the Democratic members of Congress (they are in a clear majority in both houses) to undertake to "make a record" useful to them in the coming election campaigns. If many of them have their way they will present President Eisenhower (and vicariously, Candidate and Vice President Nixon) with the necessity of accepting certain measures or of vetoing them -measures which they hope to be able to convince the voter are both good for the country and of Democratic origin. If they are successful in thus persuading the voter of their excellence, a veto by the President would then be useful not only in elevating themselves but in condemning their opponents as enemies of progress. In very brief, this short period in which a Democratic Congress is to be at work is all-but certainly to be devoted intensively to "politicking" in a sense that thoughtful men can hardly approve.

If the Democratic party is really desirous of giving the people a foretaste of what it would do if in full control at both ends of Pennsylvania Avenue next year, let members of Congress start in at once at least to frame legislation that would give effect to some of the planks in their platform. Let them, for example, work out in broad outline the sweeping changes which would give their President full control of the Federal Reserve System. They might, if they really want to reveal their general ideas or at least their trend of thought on the subject, make the Federal Reserve Board a part and parcel of the Treasury Department. There was a time, of course, when under Democratic Administrations the Board of Governors, was hardly much more than that. There was a war, of course, which, for a time, made a good excuse for such a system, but even before the end of Mr. Truman's second term the arrangement became so indefensible in the eyes of the knowledgeable sections of the public that it had to be abandoned.

But there are a number of influential members of the Democratic party and a number of Mr. Kennedy's most vocal supporters who look back nostalgically to those days, and who would have some such system revived at the earliest moment. Without legislation such an achievement now might not be as simple or as easy as it might seem. Of course, in time a new President could "pack" the Board even as President Roosevelt tried so hard to "pack" the Supreme Court, but that would take time, much more time quite possibly than the men in a hurry among the Democrats and their supporters would be willing to give to the matter. At any rate, the straightforward way to go about what these modern Bryan's want would obviously be to legislate the Federal Reserve System into the direct control of the President or the Secretary of the Treasury. Legislation for this purpose would not be a difficult law to frame or to draft. It could doubtless be managed even in the brief time that Congress plans to stay in Washington this summer. Of course, the President would veto any such measure—as he should—but if the Democratic party really big ideas about passing out the funds of the taxand the like, that ought not to be a cause of worry, but on the contrary a part of a "record" with which to go to the people this autumn.

Party of Spenders

Plainly, the Democratic party is a party of spenders even more so than Mr. Nixon with his ideas about agriculture can be suspected of being. It is for the most part still under the New Deal spell of supposing that we can spend our way to an economic paradise-and it has plenty of hangers on and others who would be more than pleased to be the beneficiaries of reckless spending. There can be little doubt that the Democratic Congress could find ways of making it clear what they want from the Treasury. The Eisenhower Administration is hardly parsimonious with public funds, but the "opposition" in Congress has really big ideas about passing out the funds of the taxpayers—and of worrying not in the least about deficits and the like. In point of fact, some of the most influential figures in the party as it is now constituted have large and open contempt for fiscal responsibility. One of the things that this Democratic Congress is most likely to do is to pass legislation involving the expenditure of huge funds in the years ahead. Unfortunately, this has become a "respectable" way to buy votes.

Such a course would place the President under a very definite responsibility to veto the legislation. Action of this sort on the part of the Republican President may or may not be just what the Democratic politicians in Congress would like, but however that may be, such fiscal irresponsibility must not be permitted to reach the statute books. We can only hope that the word which comes out of the

White House to the effect that vetoes of this sort can be counted upon is accurate. This, we suppose, will inevitably be a purely political part-session of Congress, but that does not mean that it must cost the people of this country the billions that would be involved in many of the schemes known to be on the program of the Democratic party.

Brighter Picture Develops For Our World Trade Balance

Foreign Trade Council's semi-annual revision of its last January's forecast estimates an increase in our export surplus to \$3.4 billion, a reduction in imports to total of \$15.4 billion, and a decline in the overall U. S. balance of payments deficit to under \$2.5 billion.

The Balance of Payments Group to date and about the same as last of the National Foreign Trade year's total. Council recently forecast an export trade surplus of \$3.4 billion for the United States this year.

\$700 million and cut its estimates position than looked possible at the start of the year.

On the basis of a surge in the first half and the expectation of continued prosperity abroad, with a strong sustained demand for American products during the rest of the year, the NFTC Group estimated that export sales will total over 1959 exports.

Increased sales of commercial aircraft, copper and steel products accounted for much of the unexpected boom in the first six months. Part of the gain was attributed also to anticipated special factors: heavy shipments of cotton, steel and jet aircraft carried over from 1959.

Imports for this year were essame rate they have been running sensus among many individual ing.

Decline in Balanced Payments

The country's balance of pay-In its semi-annual revision of ments-in which the trade balprojections originally made in ance is a major factor-will show January, the Group upwardly re- a smaller deficit than that registised its estimates for exports by tered in 1959, the Group said. The expected substantial decline in for imports by \$500 million. The the annual deficit was attributed result was a far brighter picture not only to the extremely sharp of America's international trading increase in exports but also to the Group noted, however, that the failure of imports to rise. deficit would still run at a higher rate than is generally regarded as sustainable over a long term.

Overall, the U.S. balance of payments deficit—as measured by the increase in gold and liquid \$18.8 billion for 1960. It noted that dollar assets held by foreigners—this would be a \$2.5 billion gain over 1959 exports.

dollar assets held by foreigners—will be under \$2.5 billion, the Group predicted. This represents a more optimistic figure than the \$2.9 billion deficit looked for by the Group in its annual January forecast.

> Made up of economists and other executives of U. S. international companies, the NFTC last week to revise its provisional January estimates.

In the mid-year revision of its timated at \$15.4 billion, about the forecast, which represents a con-

views, the Group took into consideration a sharp pickup in exports recorded during the first half year. Partly estimated on the basis of government statistics, the first-half totals were \$9.6 billion for exports and \$7.6 billion

While the economists differed on the question whether exports would maintain this high rate during the next six months, the majority agreed that they would not. However, the prediction of \$18.8 billion in exports marks an upward revision from the \$18.1 billion January estimate, and a substantial gain over the \$16.2 billion of export sales recorded in

The NFTC Group forecast a favorable balance of \$2.8 billion for the United States on all goods and services. This represents the expected surplus of receipts for goods and services (including travel,, investment income, etc.); totaling \$26.5 billion, over expenditures for goods and services to-taling \$23.7 billion. This also was a more optimistic figure than the \$1.6 billion goods and services balance estimated in January.

Foreign Assets to Rise

Government aid for 1960 was estimated at \$1.8 billion; private remittances of \$0.5 billion; private investments abroad at \$2.3 billion; government loans at \$1.1 billion. The total of these dollar outlays, \$5.7 billion, overbalances the \$2.8 billion of dollar receipts from the surplus on goods and services. The difference of \$2.9 billion will be accounted for by the anticipated rise of \$2.5 billion in gold and liquid dollar assets held by foreigners, and by an additional \$0.4 billion increase in long-term dollar investments held by foreigners.

Easy Credit Hinders Housing According to Mtge. Bankers Review

What a boomerang easy credit to stimulate the housing market turned out to be, mortgage bankers' journal discovers, wherein eased credit terms to offset higher costs and other deterrents have led to still higher self-defeating costs and eventually stifled housing rate growth. The journal states, "the old game has been played out, and the old road has come to its end in a bog"; the solution is to attack costs and not to expand demand without having any influence over supply. The current review of the Mortgage Bankers Association notes how housing costs rose while other prices did not and how only in times of meaningful credit restraint building costs abated.

The evidence now appears to be how other costs have soared while conclusive that the vast infusions tremendous doses of easy credit of "easy credit" to stimulate the housing market and home owner- home building economy: ship during most of the postwar period have not accomplished their objectives and, instead, have contributed to rising prices in other elements that contribute to total costs, says the Quarterly Economic Review of the Mortgage Bankers Association of America, published in Chicago, Ill.

"Henceforth easier credit cannot be looked to as the means for expanding the housing market. Future expansion must be gained in another way. That way is a direct attack on building costs. The emphasis must shift from the field of finance to the fields of design, invention, building prod-ucts, and construction methods. The importance of cost reduction has been long recognized, but the drive for it has been weakened by the supposed effectiveness of easy money in achieving the same objective. The drive should gain strength from the necessity that Creates Demand But Not Supply can no longer be avoided.'

Describing the credit changes of the postwar years, the Review

runs like this: as costs have risen terms, credit terms have been further eased and infusions of government credit, usually at bargain interest rates, have been used to compensate for increased cost; and, as a consequence, costs have received an additional boost."

Comments on Typical Proposals

"In the present Congress, proposals have been offered to give Treasury funds for the purchase of FHA and VA mortgages up to an individual amount of \$13,500. Others would eliminate downpayments altogether for FHAinsured mortgages up to \$13,500 in amount (a figure close to three times the average mortgage amount in 1947) and extend the maximum amortization period from 30 to 35 years. Still others would create special facilities for using government-backed or taxexempt credit for financing houses for 'middle-income' families and elderly families.

"While none of these proposals is likely to pass, the very fact that pensive. The rise in building cost they were introduced indicates last year for example was about that we still have to learn that 3%. Wholesale prices showed a or even balanced by an easing of Consumers' prices rose less NASHVILLE, Tenn. - Lee Davis, terms, but that, to the contrary, than 1%. an easing of terms adds to the ing that, carried far enough, this process stifles growth, and that houses financed with FHA-inperhaps such a stifling may already be taking place. The slowness of this year's recovery in the rate of house building offers dis-

turbing testimony in this respect. "The extension of loan-to-value "The extension of loan-to-value 108%, respectively. While part of ratios and maturities has been this increase may be attributed pushed to the practicable limit. Interest rates will not be materially reduced so long as the demand for funds remains high, and any efforts to combat their fact that the prices of existing level by putting government agencies into the market to supply VA and of conventionally fifunds for mortgages can only aggravate the difficulty. The old risen at the same or slightly game has been played out, and higher rates. the old road has come to its end

were being administered to the

"The trends in mortgage financing during the past aecade have greatly increased the demand for housing by increasing the ease of borrowing. There have been other consequences.

"One of these is the rise in economy, among which home fiof borrower and lender that gen-erally prevailed from the early 1920's through the early 1940's. This earlier period was on the whole characterized by falling interest rates. During the 1930's the surplus of savings in respect to investment outlets was so great that there was even talk of 'negative' interest rates and other penalties on saving."

"With the restored vitality of economy following World War II, the situation changed. Throughout the period, with mi-"The course we have pursued nor relapses in 1954 and 1958, the trend in interest rates has following the easing of credit been upward as investment demand has rather consistently run ahead of savings supply. Borrowers could no longer be assured that the money they needed would be available at terms pretty much of their choosing. 'Tight much of their choosing. money' became the recurring theme song of the last decade. Without doubt, the trends toward lower downpayments and longer maturities for home mortgages, the wheel another turn. One of by expanding demand without these would provide \$1 billion of having any influence on supply, contributed to this situation in a large way.

"A second concomitant of the effort to make home borrowing easier in face of vigorous demand has been a sharp increase in the cost of building. Land costs have doubled or trebled. Residential construction costs appear to have risen about 96% during the postwar period. For comparison, wholesale prices have risen 74%, and consumers' prices 62%. Moreremained stable over the last sevcontinued to be increasingly ex- ford & Company. the push of costs cannot be halted slight downdrift during the year.

The increased cost is reflected push. We ought also to be learn- in the average prices of new gured mortgages, the rise from 1947 through 1959 was from \$7,817 to \$14,650 and for those with VA-guaranteed mortgages, from \$7,000 to \$14,590, or 87% and to enlargement of size and improvement of quality, the importance of the strictly inflationary component is evidenced by the houses financed through FHA and nanced houses as a whole have

costly both absolutely and in with other things comparison that families buy. This conclusion is borne out by the fact that the only years when the rise in building costs abated were the years in which the effects of credit restraint were greatest, 1949, 1954 and 1957."

Insurance Firm Stock Offered

Public offering of 1,000,000 shares of common stock of Variable Annuity Life Insurance Co. of America at a price of \$12 per share was made on Aug. 10 by John C. Legg & Co. and associates.

Net proceeds from the sale of the common shares will be used by the company to expand and develop its business and to provide it with a substantial capital and surplus. Terms Chemical **Industry Our** Dynamic Giant

New York bank terms chemical one of the fastest growing of all major industries which continues to promise an ever expanding array of new products and applications.

The chemical industry is the dynamic giant of American industry—the fourth largest industry by assets and the fifth largest by sales. The Chase Manhattan Bank says in the current issue of its bi- were also associated. monthly review, Business In Brief, issued recently.

by the hundreds every year, the Be NYSE Member chemical industry is one of the fastest growing of all major in-dustries. Since 1947, chemical and allied production has grown at an annual rate of 8%, compared to 4% for total industrial production. Sales, now at an annual rate of \$27 billion, have doubled since 1947.

Growth has come from:

(1) Displacing older products (for example, man-made fibers for natural, synthetic for natural rubber, and synthetic detergents

markets by providing new, substantially better, and lower-priced products (for example, new pesticides, drugs, plastics, and high-concentration fertilizers).

Today, thousands of companies produce an estimated 11,000 end chemicals, the review reports.

Another Credit Easing Move

This week's decrease in reserve requirements of member banks in the Central Reserve Cities of New York and Chicago from 18% to 17½% effective Sept. 1, and the reduction in the required vault cash from 4% to Chemical Bank New York Trust is expected to open its office Dillon, Read & Co., Inc. headed an $2\frac{1}{2}\%$ of net demand deposits for Company, New York, announced about the middle of August. The underwriting group that offered country banks effective Aug. 25, Harold H. Helm, Chairman. deposits for reserve city and central reserve city institutions also effective on Sept. 1, will make available about \$600 million additional bank reserves, which could mean a credit extension of approximately \$3.6 billion. This move by the Federal Reserve Board is another step in the rate is considered by not a few direction of ease in the money and capital markets.

The purchases by the Federal Reserve Banks of Treasury oms goes on and this method is quite likely to continue to be the way in which the money markets will be kept on the easy side in spite the decrease in reserve requirements of the member banks in the New York City and Chicago areas. The next item on the financing agenda for the Government, according to those sup-posedly in the know, will be a "forward" or "advance" refunding offer which should attract considerable attention.

More Money in Fixed Income Securities

The money and capital markets continue to keep the attention of the investor with reports indicating that funds are being put to work in increasing amounts in not only Governments, ranging all the way from Treasury bills to the longest term bonds, but also in corporate and tax - exempt bonds. It is evident that the clouded economic picture is bringing money into the fixed income Dwyer-Baker

As far as the capital market issues is not expected to pick up very much although it is believed come into the corporate market and the proceeds will be used to pay off bank loans. This should mean that the deposit institutions will have funds that can be used to take care of new borrowings and even in some cases will be used to make purchases of nearterm liquid obligations.

Another Cut in Discount Rate Indicated

Some money market followers believe that the business pattern is defensive enough now so that there should be greater ease in money and credit conditions in the not distant future. According to some, this will come first through the lowering of the discount rate.

money market specialists to be quite vulnerable to a cut in the near future. The fact that business, in their opinion, will continue to be uncertain and on the defensive for an extended period of time will mean a lessening in the demand for loans and the rate that is charged the banks' largest and best customers will be graded downward.

Another Advance Refunding Offer Expected

The next operation by the Treasury is expected to be an offer to the owners of the outstanding issue that will be coming due in the middle and late sixties and early seventies. It is evident that the owners of the $2\frac{1}{2}$ s due in the 1960's and the 1970s, are not interested at this stage of the game in selling these bonds, not only because they have large losses in these issues, but also because they are expecting an attractive "forward refunding" offer to be coming along to them in the near future.

PUBLIC UTILITY SECURITIES BY OWEN ELY

New England Utilities Offer Good Yields

While New England electric utility stocks are relatively unpopular —they sell at an average multiple of only 14.7 times earnings, compared with a recent U. S. average of 18.4—they offer very attractive yields ranging from 4.5% to 5.8% (in fact it may be possible to find still higher yields in some lesser known issues of small companies). With bond yields steadily dropping, most of these stocks now yield more than bonds.

New England companies are generally assumed to have little or no growth in share carnings, but as a matter of fact the 11 dompanies in the table below show an average five-year compounded gain of 3%, or about one-half the national average. This should rate as at least a "plus factor." Two companies, Eastern Utilities Associates and New England Gas & Electric, approximate the national average. Is the wide disparity in price-earnings ratios fully warranted? The relatively high payout of the New England issues tends to make the average PE ratio somewhat higher than it would be otherwise: for example, New England G. & E. with its low payout sells at only 13.4 times earnings, as compared with 16.5 for Hartford Electric which pays out 81% of earnings. The "normal" PE average for New England would thus be about 13.5 or 14.

New England has been condemned by some financial commentators on two counts, lack of growth due to the demise of the textile industry, and bad regulation. New England utility executives have countered with the argument that textiles have been replaced by electronics and miscellaneous other light industries, and seem to have made out a good case, since the average annual gain in revenues in the past five years has approximated 6 or 7%. But the bleak regulatory atmosphere is another story. Maine, New Hampshire and Rhode Island appear to have the worst reputation in this respect, while Massachusetts has shown improvement.

The New England utilities earn relatively low percentages on the book values of their common stocks, as indicated by the following figures recently compiled by Walter J. Herrman, Vice-President of Southern California Gas Company:

New England Elec. Syst. 8.9%	New England G. & E 9.8%
Conn. Light & Power 9.7	Eastern Util Assoc 11.1
Hartford Elec. Light 8.5	P. S. New Hampshire_ 9.9
Central Maine Power 9.6	Central Vermont P. S 10.6
Maine Public Service 10.4	Green Mountain Power_ 10.2
Boston Edison 7.5	
	Average 9.7

The New England average of 9.7% compares with an average of 14.8% for five Texas companies, 11.0% for three Florida, 13.8% for five Illinois, etc. The U.S. average is 11.3 for electric utilities. 12.8 for natural gas distributors and 13.3 for gas pipelines (which in 1956 earned as high as 16.2).

The low average earnings in New England are a double handicap—they mean that equity financing is on a more expensive basis. Thus in 1959 New England utilities had to pay about 7% or more for equity money compared with about 41/2 % for some of the growth companies.

The New England utilities should make a determined effort to obtain a better deal from the commissions and courts, pointing out how they are handicapped in the money markets by the severity of local regulation. Such a program, if successful, would probably do more than anything else to restore these companies to their rightful position among the nation's electric utility companies.

Namm-Loeser's Offers Rights

Namm-Loeser's, Inc., which operates 11 retail clothing stores in Detroit, Pittsburgh, and Wood-mere, Long Island, is offering to shareholders of record on Aug. 4 the right to subscribe at \$7.75 per share for 108,000 shares of its common stock, (\$1 par value), at the rate of one share for each three shares held on the record date. The subscription rights are evidenced by transferable warrants.

The warrants contain a conditional purchase privilege to subscribe for so much of the 108,000 shares as shall not be subscribed for under the above referred to contain a conditional purchase privilege to subscribe for 109,278 additional shares which are expected to be made available, if conditions permit, to Namm-Loeser's Inc. by the underwriters who have purchased the stock from Arebec Corp.

The 108,000 shares constitute a new issue, the net proceeds of which will be received by the company; the 109,278 additional shares are not a new issue and none of the proceeds therefrom will be received by the company. The conditional purchase privi-leges are subject to allotment in the event of oversubscription in proportion to the shares subscribed by exercise of the warrants. Rights expire at 3:30 p.m. EDST, Aug. 19, 1960.

Ladenburg, Thalmann & Co. The manufacture chemically-modified several underwriters have agreed, subject to certain conditions, to purchase from Namm - Loeser's Inc. such of the 108,000 shares as are not subscribed for and may offer the unsubscribed shares and the additional shares, if any, in a public offering after the expiration of the rights offering.

Chicago Exch. Firms Law Review

CHICAGO, Ill.—The Chicago Association of Stock Exchange Firms is sponsoring a State Securities Law Review it is an-nounced by Gordon Bent, chair-

The session is featuring an introductory talk by Charles F. Carpentier, Secretary of State, and a panel consisting of Robert G. Cronson, Assistant Secretary of State; Theodore W. Grippo, Administrative Counsel; both former Illinois Securities Commissioners, and Donald L. Calvin, the present Securities Commissioner.

Subjects to be review are Registration Requirements, Trading in Foreign Issues, Options and Warrants on Underwritings and Insurance Stock Offerings.

THE SECURITY I LIKE BEST

Continued from page 2 rigid.

The polyvinyl - acetate emul-sions, used in the manufacture of a wide range of laminants, saturants, coatings and adhesives, are sold to the paper, textile, paint and adhesive industries.

Morningstar starches are used by commercial bakers, canners, baby-food manufacturers, phar-maceutical firms, and ready-touse food processors. It may sur-prise many people to know that starch products serve useful purposes outside the food industry. The paper and textile industries, for example, use large amounts of rights offering. The warrants also modified starch for sizing and finishing.

> Though Morningstar - Paisley's plants are already well distributed in New Jersey, California, Illinois, Missouri, Maryland, Maine and Colorado, the company plans to open new plants in Georgia and Maine by the last quarter of 1960. The sales organization has regional offices in key locations throughout the United States.

Realizing the importance of its research - and - development program, Morningstar - Paisley has more than doubled its staff during the past three years. With more than one out of every ten employees technically trained, the company has not only improved existing products but developed new ones. The new plant in Hol-The managing underwriter is ton, Maine, for example, will starches only recently developed in the home laboratories. One of the products to be manufactured there is a new cold-swelling starch for the baking industry; in the making of pies, it saves time equipment and improves quality. This new starch also has a large sales potential in other aspects of the baking industry.

> chemical division; for starches and gums, when chemically modified, sell at higher prices and improve profit margins. The com-

Long-Term Debt__\$2,492,000

for the past three years and made into useful objects, soft or should continue to do so in 1960; its first objective is to earn 4% after taxes. If the company's sales continue to grow and the 4% net profit is achieved, the Morningstar-Paisley investor may expect earnings of about \$2.50 a share in a couple of years.

Since its products have many uses and are necessary to so many industries, the company has both stability and great growth potential. Much of the 83% sales increase in the last five years is due to the introduction of new products.

For the first half of 1960, Morningstar-Paisley's earnings were 71 cents a share as against 64 cents share for the same period in 1959. The increase occurred while many companies were reporting reduced earnings. As mentioned earlier, Morningstar-Paisley's earnings should be about \$1.50 to \$1.60 a share for 1960 on a sales volume of about \$27,000,000. The company will have a cash flow of about \$2.50 a share, since depreciation charges will amount to 90 cents to \$1.00 a share. There is no reason to assume that the improvement in sales and earnings will not continue into 1961 when the company will introduce new products and have its two new plants in operation. It is also important to point out that Morningstar - Paisley is acquisition-minded, having bought six companies in the last four years.

In sum, we find that Morningstar-Paisley has taken constructive steps toward achieving future success: it has (1) expanded and improved its facilities, (2) increased its research-and-development program, (3) encouraged its profitable chemical division, and (4) continued to introduce new products. Selling at only 12 times estimated 1960 Morningstar-Paisley is putting earnings and with improvement more and more emphasis on its expected, Morningstar - Paisley stock, traded in the Over-the-Counter market, is much undervalued. It can be bought for capipany has increased profit margins tal gains without much risk.

worth 15 times earnings. However, vestment life resulted from the below indicates that while many of the growth issues were liquidated, broad generalization is not yet warranted.

The Long-Term View

Typical of the long-term constructive "sitting on your stocks" attitude is the following expression of Lazard Fund through Messrs. Hettinger and Mansfield: Endeavoring to give appropriate weight to the interplay of both domestic and international economic factors, we believe the haps uphill fight." economy remains in reasonable balance and dynamic, and a well invested position for the Fund is POPULARITY WINNERSjustified.

The Short-Term View

The tying of portfolio policy to outside factors, and with optimistic though somewhat hedged conclusions, was thus voiced, by Harry H. Hagey, Jr., President of the Stein Roe & Farnham Balanced Fund:

Business activity remained at a of the year, even though noticesectors of the economy. The most prominent contracting influence was a sharp reduction in the rate at which inventories were being subsided as the year progressed, leading to an improvement in the attitude of investors toward fixedincome securities. Common stock prices fell rather sharply from a peak early in the year and then recovered a portion of the loss. that Dreyfus reduced its holdings The weakness was most prothese lower prices, some of the by Fund's short-term fixed - income taking. securities were sold and the pro-

> > "By themselves, the usual signs of the economic weather are probably not enough to cause active pessimism; but political factors may be shaping up to reinforce them. For one thing, a Democratic administration has, so far, never witnessed as high a price-earnings ratio for stocks as a Republican administration; and the Democratic party seems to have fielded about as strong a team as could have been found. The continuation of a Republican administration will require a strenuous and per-

ISSUES

During the past quarter the popularity spotlight shifted to North American Aviation (aircraft and missile maker) and Upjohn (drug manufacturer listed in 1959). Runners-up were Continental Oil, IMB (again), ITT, and West Penn Electric, in that order. This marked quite a departure from "Business activity remained at a the previous quarter, when the high level during the first half best bought stocks were IBM, ATT, Swift and Gillette.

DIS-FAVORED STOCKS

Leading the liquidated issues was "growthy" General Telephone & Electronics; followed by RCA, Pfizer, Anaconda, Montgomery Ward, and St. Regis Paper. This contrasts with the previous quarter's top selling position of American Airlines, Chrysler, and Jones & Laughlin; only Pfizer was "running scared" in both periods.

FOREIGN ISSUES

Balanced Funds Up Buying While Stock Funds Retreat

Continued from page 20

de Vegh Mutual. Interest abroad was also evinced, mostly via single Plessey Co., and RWE. Single sales occurred in Acieries de Longwy, Air Liquide, Borax Holdings, Broken Hill Pty., O'okiep Copper, St. Gobain, Stanhill Holdings, and Ultramar.

In efficient search for high-yielding bonds, Mutual Trust took a new position in British Consols. rubber, and steel stocks. 2½s: and Institutional Income Fund bought 12% bonds due 1961 of a Latin American subsidiary of General Electric.

"UNANIMOUS" **FAVORITES**

The following 14 issues, bought by 4 or more funds, encountered "dissenting opinion"; that is, all transactions were on the buying side: Continental Can, Continental Oil, Gillette, Great A & P, Johns-Manville, North American Aviation, Philip Morris, Public Service Electric & Gas, Rexall Drug, Sherwin-Williams, James Talcott, Upjohn, West Penn Electric and Wisconsin Electric Power.

THE UNDISPUTED SELLING TARGETS

The following seven issues were sold by four or more funds, with nary a buyer: Alico Land Development, American Viscose, Martin, bought by Wellington Minnesota Mining & Manufactur- (15,000), Madison (10,000 newly) ing, Rayonier, St. Regis Paper, and de Vegh (5,000 newly); sellers U. S. Gypsum and Youngstown Sheet & Tube.

ATTITUDE TOWARD INDUSTRY GROUPS

managements buying or selling, (9,000).

not on the number of shares or in battered Brazilian Traction by the dollar amounts involved.

During the June quarter fund managements particularly favored tion, Farben Bayer, Farben drugs, electrical and electronics, Plessey Co. and Phys. Sirver and account particularly favored drugs, electrical and electronics, ties, retail trade, and tobacco stocks. Also fairly well bought, but to a moderate degree, were airline, bank, finance, food, paper, and railroad stocks. A thoroughly mixed attitude was displayed toward automotive, chemical, glass, life insurance, metal, oil,

> Textile and rayon stocks remained in pronounced disfavor.

Industries encountering a "stand-off" balance between buyers and sellers included agricultural equipment, automotive equipment, container, machinery, natural gas, radio-movie-TV, and railroad equipment stocks.

TRANSACTIONS IN THE **FAVORED GROUPS**

Aircrafts Zoom

Best bought issue in this induswith no seller. In fact, as pointed out above, North American was one of the two best-bought of all issues. Investment Co. of America was another large purchaser, with 10,300 shares. Also liked was (15,000), Madison (10,000 newly) (15,000); Madison (10,000 newly) ing the preceding quarters, both and de Vegh (5,000 newly); sellers Coca-Cola and Pepsi-Cola ranked and Johnston (3,150 all).

United Aircraft found four buyers, including National Secu- Group with 12,900 shares, fol-The following analysis of port- rities Stock and Income Series lewed by Massachusetts Life Fund folio changes, reflected in our tab- (11,100) and National Aviation ulation starting on page 21 of (10,000); sellers of this issue intransactions in nearly 450 stock cluded Selected American (10,000 issues is based on the number of all) and the United Funds Group

The Dreyfus Fund is a mutual fund in which the management hopes to make your money grow and takes what it considers sensible risks in that direction. Prospectus free from your securities dealer or write Dept. CFC, Dreyfus Corp., 2 B'way, New York 4, N. Y.

Moderate Buying of Airlines

Some buying came into Ameri-

can, Eastern, and pre-merger United. Larger buyers of American included Delaware Fund (12,000) and National Aviation Drugs Stimulate Buyers (10,000), while Madison sold 20,-100 shares. Of Eastern, specialized National Aviation bought 12,000 shares, and the Stein Roe Group 7,000; while close-outs were made by Scudder Fund (16,400) and Eaton & Howard Stock (4,900). Again, of United, National Aviation bought 7,500, and Stein Roe Stock Fund an initial 7,000 shares, whereas Overseas Securities was a lone seller.

Banks Bought on Balance

Apparently reflecting expectations of a tapering-off of the recent rise in bank earnings, which had been prompted by "tight money," the funds did not buy bank stocks as freely or uniformly as during the preceding quarters. Nevertheless, more of these issues were bought than sold. Best bought was Chemical Bank New York Trust, acquired by six managements and sold by only one, namely, Dreyfus; the largest buyer was Wellington Fund with 30,000 shares, followed by Madison with 5,000. Also liked were First National City Bank of New York and Security-First Natry, by far, was North American tional Bank of Los Angeles, as Aviation, by eight managements, well as Firstamerica, the bank well as Firstamerica, the bank holding company. The divergent attitude toward bank stocks was highlighted, however, by the fact that two funds, namely, Dreyfus established a new position in this and Shareholders' Trust of Boston, issue, with a 30,000-share stake. eliminated all the bank stocks in National Securities Stock Series their portfolios (7 and 5 issues, respectively).

Beverages Effervesce

Continuing their popularity durwere United Science (6,300 all) fairly well during the quarter on the score of fund managements' acquisitions. Largest buyer of Coca-Cola was the United Funds (9,000), Scudder Fund (8,000) and Investment Co. of America (7,-700), the three latter all establishing new positions in the stock. Transactions in Pepsi-Cola were even larger, with Fundamental Investors buying 72,400 shares, and three other funds making initial acquisitions, while the Stein Roe & Farnham Group was the only seller, with a closeout of 23,000

Building Stocks

In this group, the spotlight was fus, focused on Johns-Manville and Sherwin-Williams, which were bought by five and four managements respectively, with no seller. Largest buyers of J-M were Investment Co. of America (16,000 managements buying and five newly) and Investors Mutual (12,- selling), and in Ampex (five 100). A prominent buyer of sellers, including Delaware Fund Sherwin-Williams was Fidelity with all its 21,500, and Madison of 6,800 shares.

Reflecting the divergent attitude toward building and related stocks, however, was the funds' action on the following stocks: Bestwall Gypsum, which has long constituted one of Lazard's largest individual holdings, was reduced by this fund in the amount of 3.750 shares; completely closed had acquired it only during the preceding quarter; and bought newly by Lehman (10,000). Two growth stocks in this group, n a m e l y Minneapolis-Honeywell and National Lead, were also selling targets; the former was sold by Tri-Continental (9,500) and Howard Stock Fund (3,000). Antic-

ipating the lower earnings which have since been reported, U. S. Gypsum was sold by Fundamental Investors (32,500), and three others, with no buyer.

Leading the parade of drug stocks liked and, in fact, of all stocks bought during the quarter (as pointed out above) was Upjohn (which advanced from 46 on March 31st to 51 on June 30th); its largest buyers included Wellington (29,500), Dreyfus (14,-000 newly), Chemical Fund (12,700), and Lehman newly), with no seller. Second best liked drug stocks were Abbott Laboratories and Rexall; Abbott notwithstanding a 20,000 share close-out by Chemical Fund. By far the largest purchase of Rexall was made by Fidelity Fund, with an initial acquisition of 21,500 shares, followed by a 12,500-share purchase by Selected American. Heavy selling, on the other hand, once more struck Pfizer (a former "growth" favorite), its largest sellers were the United Funds Group with 49,700, Fundamental with 51,000, One William Street with 20,000, Eaton & Howard Balanced with 17,000, U. S. & Foreign Securities and Commonwealth Investment with 10,000 each. The only buyers were Dreyfus (5,000) and Guardian (2,500 newly). Opinion was more divided on Merck, sold by seven and bought by five managements, with Dreyfus the largest buyer (12,000 newly) and Affiliated Fund the largest seller (6,200).

Electric and Electronics Regain Favor

During the latest quarter, the best bought position in the electronics group shifted from General Electric to I.T.T. (possibly contributing to G.E.'s market weak² ness). Largest buyers of lTT were MIT (61,000 newly), Incorporated Investors (60,000 newly), and One William (25,000 newly); with Affiliated Fund the sole seller (39,400). The second best bought stock in this group was a foreign issue, Siemens & Halske (marking a departure from the leading position of long-popular Philips Lamp Works). Siemens, which had been more sold than bought in the preceding quarter, found its largest buyer in Dreyfus (17,-500 newly), while Wellington was the only seller (25,000 all); another initial buyer was de Vegh (5,000). Philips' Lamp was bought by six managements, including Fidelity Constructive Attitude Toward (10,100), Lazard (4,225), and Consolidated Investment Trust (4,000 newly); the sellers included Drey-fus, United Continental, and Continental, and Energy Fund.

Marking the rising disenchantment with the "glamor-growth" issues was the stand-off in Texas Instruments' transactions with an initial acquisition Fund with all its 7,500 shares, versus four buyers).

Particularly heavy selling hit RCA, making it the second most frequently sold of all stocks during the quarter. The 10 managements selling RCA were lead by Wellington (42,300), Lazard (36,-500) and Selected American (16,500), while a 12,000-share initial purchase made by Scudder out by de Vegh (1,500), which Common was the largest of three acquisitions made.

Finance Companies in **Moderate Demand**

Some fair-sized buying demand centered on First Charter Financial and James Talcott. The former Lazard (all 7,500 shares), with found its largest buyers in Eaton Guardian Mutual the only buyer & Howard Stock Fund (25,000 (500 newly). National Lead was closed out by Putnam (all 10,000 nam was also a large buyer of shares), Dominick (all 4,500), James Talcott (15,000 newly), Chemical Fund (5,200), Lazard although topped by Fidelity Fund with a new acquisition of 28,500 and others, while bought only by with a new acquisition of 28,500 Wellington (2,900) and Eaton & shares and followed by Dreyfus Continued on page 25

Balanced Funds Up Buying While Stock Funds Retreat

Continued from page 23 (10,000 newly); there was no seller of this issue. Great Western (2,000). Financial, the high-flying issue in There was some buying unthe West Coast savings and loan accompanied by selling of National growth-group, found its largest Cash Register and Moore Corpobuyer in Madison (10,000 newly), ration, the Canadian growth stock. followed by Putnam (2,400), with only State Street a seller (5,750). Papers Again Picked Up Interestingly, this popularity of the finance company group with the funds, along with its subsequent market strength, occurred midst the sharp decline in interest

Food Issues Palatable

provoke the best demand, al- the largest acquisition made by though not as outstandingly as in Niagara Share (4,600). Rather the March quarter when this issue heavy selling come into St. Regis was the second best bought indus- Paper, especially from the Scudder trial stock. Of Swift, Delaware Group (25,600); without any Fund bought 11,000 shares and Lehman and Investment Co. of America 10,000 each, the only Utilities Conspicuous seller was Dreyfus with a 20,000 Favorites close-out. A new name in investment company portfolios was an over-the-counter issue, Frito, a leading producer of snack foods, attracted Lehman into establishing a new 50,000-share position; and Texas Fund (2,000 Best additionally). Selling was mildly prevalent in Corn Products, although not strongly so.

Fire & Casualty Stocks To the Fore

cumulations. Employers' Group Group with 38,500 shares.
Associates, the Boston-managed Within the minority of termed a "store-house of value with aggressive management" (and which has recently added a life insurance unit), was bought additionally by the Eaton & Howard Group (via a 30,000 share block) and Bullock Fund (2,000). Government Employees Insurance, the dynamic growth company, which is presently mulling over its previously stated intention to enter the variable annuity field, was newly acquired by Madison (6,000) and also bought by de Vegh (1,500); (30,000 shares of this issue are held by Wellington Fund). Hartford Fire, perennially considered one of this group's three blue chip issues, was bought by two funds, State Street(6,300) and savings bank-owned Institutional Investors Mutual Fund (1,200); sold by none. Stock exchangeand Guardian (1,600 all); and bought newly by Broad Street Travelers, the highly diversified industry giant, which is quoted 25% below its post-split all-time high of two years ago, was sold by Incorporated Investors (23,100), Putnam (16,000 all), and Broad Street (7,000 all), although bought by Eaton & Howard Stock Fund (2,000) and Lazard (1,100).

Office Equipments Still Clicking

Still standing unscathed in the price-earnings stratosphere was IBM, untouched by the skepticism and market-grubbing dealt many other growth issues. An outstandingly large buyer of this issue was Wellington Fund, which added a large block of 12,500 shares bringing its total holding to 40,000 shares. Other large buyers included Fidelity (3,600) and Dreyfus (3,000). Substantial sellers Consolidated Investment

Scott, maintaining its status as a growth stock as well as a growth company, was bought by MIT (17,500), Eaton & Howard Stock (5,000) and Chemical Fund (3,100), and sold only by Commonwealth Investment (2,000). Three funds bought Fibreboard In this group Swift continued to Paper Products, with no seller; buyer.

Widely attributed to "defensive" motivation, along with the decline also sold heavily by the Value in competing yields, was the in-flux of buying into the utility also parted with 8,200 shares of group.

Best bought utility stock was West Penn Electric; its largest buyers included United Accumu- Stocks lative (50,000 newly) and Fundamental Investors (20,000); not a were Sears, Roebuck and A & P. single fund selling. Also well Of Sears, Wellington bought 20,-bought was New York State Gas 000 shares and was joined by four Reflecting both the upturn in was Mutual Investment Fund coming from the Bullock Group, the industry's condition via the (10,000 newly), joined by five which sold 22,000 shares. There current marked improvement in other managements, with only were only buyers and no sellers of underwriting results, as well as National Securities Income Series A. & P. The buyers included Inthe dulling of the public's em-making a 24,900 share sale. Also vestment Co. of America (39,500) the dulling of the public's emphasis on market liquidity follow-well liked was Public Service ing the recent reactions, the fire Electric & Gas, bought by five and casualty issues have remanagements and sold by none; Funds Group (16,400). Opinion entered one of their major actual telephone is the largest buyer was the Bullock was divided on deflated Dominion cumulations. Employers' Group Group with 38,500 shares

Within the minority of utilities company, which has been recently sold, the largest block disposed of was 125,000 shares of Carolina Power & Light sold by Wellington Fund in a complete close-out; of the same stock, however, United Accumulative made an initial purchase of 30,000 shares. Another substantial close-out was a 40,000 share block of Duquesne Light by One William Street. This fund also sold 28,000 shares of Southern Co. (the issue in the growth territory which has been sensationally rising ever since its splintering-off from the dissolved Commonwealth & Southern Group).

Opinion on A.T. & T., highly favorable in the March quarter (10 buyers versus one seller), turned divided during the June quarter (six buyers and three sellers). Largest buyers Fidelity Fund (24,200) and Broad Street (15,000), largest seller was tinental Insurance was sold by National Security Stock Series One William Street (15,000 all) of Concret Teles. Heavy selling widely liquidated of all stocks; the sellers were led by One William Street (70,000), Affiliated Fund (30,000), and Madison Fund

(16,000), with Wall Street Investing making the only small purchase (1,000).

Improved Sentiment Towards Rails

Trust (2,082), and Dividend Spurred perhaps by the wave of Shares in the Bullock Group constructive merger proposals and notwithstanding sagging rail carloadings, the funds took a more constructive attitude toward the carriers. Best bought rails were Atlantic Coast Line and Nor-folk & Western. These two as well as Southern Pacific, Southern Railway, and Union Pacific moved out of the "sold" column of the March quarter into the "bought" column. A large acquisition was the purchase of a 45,500 share block of Southern Pacific by Investors Mutual; this fund (once more the largest of all funds in terms of net assets at quarter's end) also added 20,-100 shares to its holdings of Southern Railway and 9,400 shares to its stock in Norfolk & Western. Of the latter road, however, Wellington Fund acquired a larger block, namely 19,350 shares. There were only sellers and no buyers of Missouri Pacific "A" and Nickel Plate. Mopac was chucked by the United Funds Group (40.000) and

Interest in Retail Trade

& Electric, whose largest buyer other funds; with the only dissent Continued on page 26

Stores Ltd. (the Canadian giant) and Grand Union, of which latter Affiliated Fund bought 33,700 shares, Fidelity Fund 30,000 (newly), while Incorporated Investors sold 54,050, Lehman 28,275 (all), and the Tri group 24,760. The most heavily sold retail stock was Montgomery Ward, whose six sellers included Mutual Investment Fund (7,000 all), with Lazard the only buyer (10,000).

Tobaccos Still Satisfying

Once more tobaccos numbered among the better bought groups. Philip Morris was bought by five managements and sold by none; the largest buyer being Tri-Continental in a new acquisition of 10,000 shares. American Tobacco, post-split, was acquired by Dreyfus (15,600), Madison (15,000) and others. Tri-Continental was also Atomic Development Mutual). the largest buyer of Reynolds
Tobacco (15,000 newly), although Highly Selective Action on Affiliated Fund shed 63,400 shares Chemicals of this issue. Opinion was divided on Liggett & Myers, with the National Securities Group on the buying side and Investment Co. of America the principal seller (10,000 all).

There were no buyers of troubled Chrysler and sales were large (all 74,200 shares of the Fundamental Investors group and 10,000 of

Best bought chemical issue was buyers included Chemical Fund with 8,300 shares and the United ton bought 3,200 and Selected American 5,000, with Fidelity dissenting to the tune of 13,000 shares sold. The United Funds Group appeared as largest buyer Managements buying Ford out- of both Allied Chemical and Air to four. Largest buyers were In- shares, respectively. Opinion was divided on du Pont, with five buying and five selling managements: the largest buyers were the United Funds Group (6,600) and One William (3,500). Heavy selling came into Monsanto, of which block of 128,000 shares; and once more into Rayonier, of which the Fundamental Investors - Diversified Investment Fund Group sold 22,300 shares, Fidelity all its 13,-000 shares, Investors Mutual 5,100, and Madison 2,400.

Split Attitude Toward Glass

In this diverse group, Owens-Illinois Glass was fairly well bought, especially by Fidelity (17,500 newly) and Tri-Continental (10,000). But opinion was were particularly large in Libbey-William the largest buyer (30,000

Mixed Action on Life Insurance Stocks

Here, both Aetna Life and Transamerica, the large holding company, left buyers and sellers in a stand-off position, although Fidelity Fund appeared as a large initial buyer of 34,900 Transamerica shares. In Connecticut General, and National Life & Accident, sellers had a slight edge over buyers.

Diverse Thinking on Aluminums

Transactions were exceedingly large in Aluminium Ltd., whose eight buyers included the United Meet Standoff Reaction Funds Group with 41,000 shares and Lazard and Dreyfus establishselling of Kaiser Aluminum by the buying side. sanction for its decay-moderating

Incorporated Investors (92,000 Cross-Currents in the Steels all), Fundamental Investors (38,-000 all) and Madison (12,200) greatly outweighed One William's initial purchase of 40,000 shares.

Diverse Attitudes Towards Coppers

The last quarter's portfolio operations left Anaconda and Kennecott with an edge of sellers speculative interest in Fruehauf over buyers and Phelps Dodge in Trailer, of which Wellington alone a standoff position. Large selling

In the case of the oils, surely the most controversial group both The largest sellers of GM were as to industry and investment

The problem besetting the portfolio managers here highlights general portfolio difficulties arising from major price reactions occurring after, but only partially erasing, previous large long-term profits. Investment managers, particularly if they are uncertain over the oil industry's future, face the decision of whether to take what may turn out to be a cyclical loss while incurring sizable capital Hooker Chemical whose six gains taxes (as a result of the accrued tax on the still remaining large capital appreciation). In any Funds Group with 17,000 shares. event, seemingly unjustifiable has Next best liked was Food Machinbeen many funds' practice at ery & Chemical, of which Welling- times of higher market levels, of switching from one oil issue to Textiles in the Dumps another, resulting in their distribution of corresponding capital gains dividends-with the incurrence of capital gains taxes by their shareholders.

A clear favorite among the oils was Continental Oil whose seven buyers included the Bullock Fund (6,000 newly), Investors Mutual (5,200) and General Public Service (5,000 newly); not a single all) and Concord Fund (7,000 all); fund appeared as a seller of this with no buyer at all. There was issue. Second best liked oil was no buying either in Burlington In-Wellington closed out its huge Phillips Petroleum, whose buyers were led by Fundamental Investors (50,000), Investors Mutual (20,800), and MIT (15,700); the sole seller was the Bullock Group. Particularly large transactions took place in Ohio Oil, with a single purchase of 78,300 000), joined shares by Wellington; in Royal Fund (4,000). Dutch, with 25,816 shares bought by Investors Mutual and 28,660 sold by Fundamental; in Shell Oil, of which Investors Mutual bought 40,300 shares; in Sunray Midnental (10,000). But opinion was Continent, of which the National divided, with the net result of an Securities Group bought 59,600 edge of selling over buying, in shares; in Texaco, of which the Libbey-Owens, Corning Glass, Tri Group bought 26,000 shares Pittsburgh Plate. Transactions and One William Street—Lehman were particularly leaves in Libber. sold 32,500 shares; in Gulf Oil, of Owens, with Chemical Fund the which the United Funds Group largest seller (36,100) and One bought 24,000 shares and One William Street closed out its 71,-885 shares; and in Socony Mobil, Selling hit hard at Sinclair Oil, son Fund (10,000 each newly). in anticipation of its dividend cut; As in the previous quarter, Colthe five selling managements included MIT with 70,000 shares. Standard Oil of California and Standard Oil of New Jersey remained in the "sold" column. Of the former, Wellington was the largest seller (48,000); of the latter, the Scudder Fund and U.S. & Foreign Securities with 10,000 shares each, whereas National Securities Stock Series appeared with an initial purchase of 45,000

Rubber and Tires

Bearishness on the steels engendered by the recessionary steel operating rate was balanced somewhat by hopefulness about underlying intrinsic values and better lying intrinsic values and better future earnings trends with Alle- Denver Analysts gheny Ludlum, Armco, Copperweld, Granite City, National Steel, Republic Steel, and U.S. Steel, ing and selling fund manage- Analyst for FIF Management Corments. De the largest seller (31,400), and One William the largest buyer (20,000). In U. S. Steel, Fidelity again led the sellers (39,500), followed by the Fundamental-Diversified Investment Group (37,000) and Madison (13,600 all); with MIT the largest buyer (18,500). Of Bethlehem, Fidelity was likewise the largest seller (38,000), joined by Putnam (20,000 all), while National Securities Stock Series bought 15,000 shares. Of Jones & Laughlin, Wellington closed out its 40,000 shares and the Fundamental Group sold 30,-000; while on the other hand, Lazard added 7,500 shares to its holdings. Of Youngstown Sheet, nancial Industrial Fund, Inc. and 29,800 shares, joined by three other funds as stated above in 'our" unanimous list; there was a

GROUP

culean efforts at diversification, fund managements still consigned house.

Heaviest selling was directed at American Viscose, especially by Fidelity Fund (26,100 all), Investment Co. of America (50,000 dustries, whose sellers included Tri - Continental (6900 all) and Dreyfus (25,000). The only textile issue favored by a few buyers and with an absence of selling, was diversified Celanese; here Dreyfus was a substantial buyer (10,-000), joined by United Science

ATTITUDE TOWARD MISCELLANEOUS ISSUES

Continental Can was a wellliked issue, with Fundamental the largest buyer (29,000), and no sellers. Selling came into American Smelting & Refining, especially from Wellington (50,000 all) and Fidelity (17,500 all); while MIT led the buyers with 12,000 shares. Haloid Xerox attracted particular interest, espe-cially on the part of Wellington of which National Securities Stock (33,100), Chemical Fund (19,700), was the largest buyer (23,500). and National Investors and Madigate-Palmolive remained disliked on balance, finding its largest sellers in National Securities Income Series (28,600) and Mutual Investment Fund (12,000 all); the only buyer was Investment Co. of America, establishing a new position with 8,800 shares: Minnesota Mining & Manufacturing was the selling target of four funds, led by Wellington (20,000) and Niagara Shares (12,000); there was no buyer. On the other hand, Lazard Fund established a new position of 25,000 shares in Newmount This group remained more or Mining, whereafter Andre Meyer, ing new positions with 30,000 and less in a standoff position, with the senior partner of Lazard 20,000 shares, respectively; on the only Goodyear facing more sell- Freres & Co., was elected to the other hand, Wellington sold a huge block of 147,000 shares, ers than buyers; the sellers in- board of this diversified holding, while Chemical Fund closed out cluding Fundamental (49,000) and management and development its 49,000 shares. Wellington also Incorporated Investors (21,500), company for metals and oils. sold its entire 50,000 share hold- as well as Wellington (30,000), Procter & Gamble attracted three ing in Alcoa, while Lazard (new-with Investors Mutual (24,300) buying funds prior to its recent ly in Aluminium Ltd.) terminated with Investors Mutual (24,300) on strong rise following the official its 10,000-share position. Heavy and Colonial Energy (13,000) on strong rise following the official

toothpaste. Finally, the Putnam Fund established a 15,000-share position in newly-offered Uris Buildings Corporation.

Can We Play the Dollar Exchange Standard Game

Continued from page 3

ference between our net, cumulative deficit of \$14.2 billion and our grants of \$60 billion was spent or invested in the United States by foreign countries or was used to increase their holdings of dollar assets. The overall postwar deficit on our balance of payments was deliberately planned.

The Recent Gold Outflow

The deficit on our balance of payments, however, has not been the item of principal concern to Americans. Attention, since 1958, has been focused on the gold outflows from the United States.

Taking the period 1946-1959 as whole, the United States exported, or lost, about \$525 million in gold with total gold exports amounting to \$6.54 billion and imports totalling \$6.02 billion. Beginning in 1958, the gold outflows assumed larger proportions, totalling \$2.3 billion in that year. In 1959, the outflows are estimated at about \$1 billion.

The simple-and basically important-fact is that many nations today are using gold and dollar exchanges as reserves for their banking system and for their foreign trade transactions. Foreign governments and their official banking, credit and exchange institutions can obtain gold on demand from the United States Treasury; not as a matter of law, but as a matter of Treasury policy. Private individuals and firms abroad, as well as at home, cannot obtain gold for dollars. Should the Treasury ever decide to do so, and let us hope that it never will, it could arrest this flow legally by simply refusing to pay out gold to official institutions in exchange for their dollar holdings.

The question has already arisen: Why do other nations elect to convert their dollar holding into

Well, no one knows for certain just why some nations have shown a number of possible reasons suggest themselves:

(1) National treasury and financial officials may be losing confidence in the dollar.

(2) National treasuries may desire to "sweeten" or improve the proportion of gold in their foreign exchange and banking reserve

(3) Our relatively low rates of interest on short-term holdings may not have proved sufficiently attractive to induce foreign holders of dollars to forego gold and invest in our country.

ing the price of gold, may have prompted foreign officials to purchase gold now.

The recent improvements in our gold position — a substantial decline in the rate of outflows during the latter months of 1959 and the first quarter of 1960 strengthen belief in the second reason listed above: The desire of national treasuries to increase the proportion of gold in their bankng and foreign exchange reserve holdings. It has long been traditional on the part of some treasuries, to include a certain ratio of gold in the composition of these holdings, and as their reserves have increased, they needed increased amounts of gold to maintain their desired propor-

Recent Structural Changes in the United States Balance of Payments

The anatomy of the deficits and surpluses in the United States international accounts, 1956-59, is shown on Table I.

It is a far cry from the years immediately following World War II and the dollar gap when we had a large excess of exports of merchandise and services, including income on investment, over our imports of these items. This gap was substantial and, in those years, ran between \$3 and \$5 billion a year.

As Table I shows, the dollar gap on merchandise and services disappeared in 1959. In this year, the services accounts alone, excluding investment income, showed a deficit of \$300 million. The deficits on our unilateral transfers, private remittances and government grants, which have been chronic since the inception of the Marshall Plan, showed but little change during the period 1956-1959, at \$2.3 to \$2.4 billion

The total outflows on account of United States capital investa recent preference for gold, but ment abroad, both government and private, were also quite steady during this period, varying from \$3.6 to \$4.1 billion a year as was, except for 1958, the inflow from foreign long-term capital investment in the United States.

The total deficit on the balance quence." of payments as a whole grew from 1956, when it stood at \$1 billion, to 1959 when it attained the level of \$4.9 billion. This over-all deficit on our balance of payments enabled our trading partners to increase substantially their holdings of dollar assets and gold. The increase in dollar assets was espe-(4) Fear of a possible future cially large in 1959, amounting to devaluation of the dollar, by rais- an estimated \$4 billion. The gold

in 1959.

In recent years, the principal features of the structure of our balance of payments have been:

(1) A decline in our exports of merchandise.

(2) An increase in our imports of merchandise. (3) An excess of services ex-

ports over imports. (4) Substantial earnings of investment income.

(5) Declining surpluses on our current accounts. (6) Large private and govern-

ment lending and investment abroad. (7) Small foreign long-term in-

vestment in the United States. (8) The stability in U. S. Government aid to foreign countries. (9) An increase in foreign hold-

ings of dollar assets. (10) An increase in foreign gold purchases in the United States.

Suggested Remedies for Balance Of Payments Deficits

The changing structure of our balance of payments and the newly-emerging deficits have provoked a rash of suggested remedies. The high tariff advocates GATT, Reciprocal Trade Agreements, our program of tariff reductions and customs simplificatheir support of the Buy American

aid programs, estimating that the American industry. We could, if we so desired or deemed in our interest. international economic policy does not have any great impact on our economy as a whole. But the effect of our policies on our trading partners is something else again.

Monetary Standards

The position of the United States in foreign trade has been reinforced by another important postwar development. The world has gone over to a new currency view, the high level of American system — the dollar exchange standard. This new standard gives us additional lattitude for independent action, but it places heavy moral responsibilities on us. The United States, it should be noted, is not on the dollar exsuggestion has been made that the change standard; we are on a modification of the gold standard, the international gold bullion standard.

matic and ideal as some of the which had long used London as The adequacy of international re- equity, to furnish flexible sources treatises on economics would lead us to believe.

In times of gold shortages, some countries utilized a modified form of this currency system known as the "gold bullion stand-This monetary system, invented in 1815 by David Ricardo, was utilized by Great Britain at the close of the Restriction Period in 1818 and again, when Britain returned to gold payments in 1925. Under this system, currency notes were not redeemed pound for pound, in gold. The Treasury stood ready to redeem notes and to supply gold for foreign exchange in large or "wholesale" amounts - in 1925 the minimum amount redeemable in gold was £5,000—and the money was not redeemable in gold sovereigns but in gold bars or bullion.

Calls Our International Gold Standard Weak

The weakest form of the gold standard is the international gold bullion standard, adopted by the United States in 1934, and still in effect, when we raised the dollar price of gold and abandoned the complete gold standard. Under this monetary system, the United States Treasury stands ready, not as a matter of law but as a matter of policy, to sell gold against dollars to the official banking and financial institutions of foreign governments. No private citizen or institution, American or foreign, can obtain gold in any amounts against dollars. Private trading in gold, except newly mined gold and coins of numismatic or collector's value, is forbidden. Since the Treasury de- to constitute 52% of them. In other fines coins of a numismatic value as all those struck before 1934 dollar has not only become the and since no gold coins have been struck since 1834, the regulations principal constituent of the reallow some latitude in gold dealings.

In an earlier epoch when colonial empires prevailed, several metropolitan countries employed the gold exchange standard their colonies. These colonies were then on silver standards. Since silver standards, with the added risk of variations in the gold price of silver, were not well adapted to foreign trade in a world on the gold standard, the gold exchange standard was devised to allow these colonies to continue to utilize silver for their domestic needs and to obtain gold for their international trans-

With the abandonment of the various forms of the gold standard the nations of the world adopted various inconvertible paper standards. Reserves were, however, required as backing for the central bank's note issue and deposit liabilities. In addition, countries required international reserves to take care of the day to day fluctuations in their balances of payments and to meet varying dimensions and durations.

"International Reserves and Liquidity."

From 13% of the gross foreign exchange assets of the world in 1947, the dollar had risen, by 1957, words, since World War II, the key currency, it has become the serve holdings, both domestic and international, of all nations. The present monetary standard used by most countries is a special form of the foreign exchange standard; the dollar exchange standard.

The United States dollar has replaced gold as the currency and international reserve standard. Perhaps we did not plan it this way, for this result was less the end-product of conscious planning than it was that of the growth of America's economic power and changes in the pattern of the world economy. Nonetheless, without our aid and loan program, it is doubtful that the dollar exchange standard would be what it is today.

"International Reserves and Liquidity."

The Rules of the Dollar Exchange Standard Game

be found by equating them against imports as is done in Table III, there is no fixed ratio which would apply to all countries at all times. The adequacy of reserves depends upon the credit-worthiness of a nation, its credit facilities, the international environment, exchange rates, price structure, the extent to which its international accounts are in balance and confidence in its currency; among others. Each nation must determine, on the basis of experience, the amount of reserves which it requires.

The availability of dollars for reserve purposes is but one aspect of the "dollar exchange standard game." If the United States dollar is to maintain its present position in the world, we must play the dollar exchange standard game just as the gold standard countries were supposed to play the "gold standard game" a few decades ago. From this point of view, when we planned our balance of payments deficits, as indicated in the opening paragraphs of this article, we were playing the dollar exchange standard game correctly for we supplied dollars to countries as their needs for them increased. Conversely, as the need for dollars diminishes, we should be prepared to absorb them and we should also help other nations in their reserve requirements during the swings of their business cycles and for their sustained secular growth.

Two other obligations imposed by the dollar exchange standard game are obvious: The dollar must remain a stable and reliable currency and the United States should The use of the dollar as the dampen the cyclical swings of its world's exchange and reserve economy so that they will have a money has certain great advan- minimal effect upon its trading tages for the United States and it partners. Stability implies a steady price level, no inflation, the maintenance of the present price of The principal advantage lies in gold at \$35.00 per troy ounce and the great independence of action the convertibility of dollars into as that utilized by the competent which this standard affords. We gold as demanded by foreign au- and conscientious banker.

To insur price of gold and the complete of our import tariff through Reinternational interchangeability of ciprocal Trade Agreements or GATT negotiations. The reduction It is also easy for us to adopt of our trade barriers is a high to be sure, but the beneficial effects of the increased, long-run, welfare of the rest of the free world on our own economy may be well worth the sacrifice.

In many ways we are less well equipped by our credit institutions to play the dollar exchange standard game than Great Britain was, in the heyday of sterling, to play the gold standard game. Our ance upon letter of credit financposition of the dollar imposes on ing with the limitations which commercial bank financing places The first of these obligations is on foreign transactions. We need

tomers.

Advises Against Unilateral Policies

the dollar, it is morally difficult for us to pursue unilateral policies in the realm of international ecois less important to us than it is to the other countries. Through the dollar exchange standard, our actions have a heavy impact upon all our trading partners and these partners should be consulted before any important line of international action is determined which could affect their reserve positions. An excellent medium for these consultations already exists in the International Monetary Fund.

There is a strong analogy be-Although a statistical measure tween the management of interof the adequacy of reserves may national dollar reserves and the management of banking reserves. Since the amount of dollar and other foreign exchange available for a nation's bank reserves depends upon a nation's foreign transactions, there is a tendency for the amount of money and credit in circulation to be determined, or limited, by surpluses and deficits in the balances of payments. As surpluses arise, reserves increase and an increased volume of money and credit can be sustained. Deficits have a deflationary effect, for they reduce reserves and the ability of a nation to maintain a given volume of money and credit.

> During the gold outflows of 1958 and 1959, many thoughtful people were worried lest our gold holdings be drawn below the required 25% currency reserve. In addition, the large dollar holdings of foreign nations caused concern, for it was feared that if all foreign nations demanded gold for the dollar holdings, our gold reserves would be almost entirely drained away.

Since, under the dollar exchange standard, the United States is the world's banker, we assume the risk that any banker does of a run. If all the holders of dollars were to demand gold at the same time, we would have to close our doors just as a banker would if all of his depositors were to demand cash at the same time and he could not find assistance elsewhere. Just as the depositors of a bank have no interest in starting a run, those nations on the dollar exchange standard have nothing to gain in wrecking the dollar, for they would destroy their own banking and currency, as well as their international reserve systems in the process. Our risks are similar to those of the commercial banker and our monetary management demands the same prudence, integrity and conservatism

To continue to play the dollar exchange standard g To meet these banking and in- ments than must other nations, for in and out of national reserves, the doubtless need to continue to run extent in the manufacture of those countries, no longer on a shortage. Our principal concerns to reduce its barriers to trade. ments until other nations' reserves are adequate and to allow for the secular growth of their economies. Just as the local banker can do much, or little, for his community by conservative, yet imaginative, banking, the United States can do much, or little, to aid in the development of the free world. This is a challenging, but rewarding, assignment and one which deserves the thoughtful attention of all our businessmen.

Calif. Investors Branch

VAN NUYS, Calif. - California Investors has announced the appointment of Charles E. Marland as Resident Manager of the new office located at 14401 Sylvan Street.

Evans Rule Co. Common Offered

McDonnell & Co. Inc. is manager In view of the world position of of an underwriting group which offered publicly on Aug. 10, 145,-000 shares of Evans Rule Co. common stock at a price of \$12.50 per nomic relations. As indicated in share. The offering marks the first an earlier paragraph, what we do public sale of the company's common stock. Of the total number of shares offered, 40,000 shares are being sold on behalf of the company and 105,000 shares for the account of certain selling stockholders.

A portion of the proceeds from the sale of 40,000 shares of stock will be used by the company to purchase two leased plants in Elizabeth, N. J. The balance of the proceeds will be added to working capital and will be available for general corporate pur-

Evans Rule Co., with its headquarters in Elizabeth, N. J., is engaged principally in the manufacture and sale of a complete line of precision steel measuring tapes. The company recently started production of a line of wood folding rules as a complement to its existing line of measuring instruments. For the fiscal year ended April 30, the company and its af-filiates had consolidated net sales of \$3,531,484 and net income of \$372,791.

Upon completion of the current financing, there will be outstanding 400,000 shares of common

First Offering Of Arco Stock

Michael G. Kletz & Co., Inc. and associates offered on Aug. 10-170,000 shares of Arco Electronics, Inc. class A common stock at a price of \$5 per share. The offering marks the first public sale of the company's class A common stock.

Net proceeds from the financing will be used by the company for various corporate purposes, including expansion and improvements of plants and equipment; the carrying of additional inventories; for research and development; for expansion of advertising and merchandising activities, and for the cost of a recent acquisition. The balance of the proceeds will be used for additional working capital.

Arco Electronics, Inc., with its executive offices, factory and principal warehouse in New York City, is a Delaware corporation organized on Feb. 15, 1960 as successor to a New York corporation of the same name which started business in 1945. The company, together with its four subsidiaries, is engaged primarily in the distribution and sale of capacitors and related products manufactured by others, and to a limited such items. Capacitors are basic electronic components essential to all types of electronic circuitry, having innumerable commercial, industrial and military applica-

the six months ended For March 31, 1960, the company and its subsidiaries combined with the operations of a predecessor partnership, on a pro forma basis, had consolidated net sales of \$1,-242,128 and combined net income of \$131,427. Upon completion of the current financing, outstanding capitalization of the company will consist of 482,500 shares of class A common stock and 362,500 shares of class B common stock.

American Motors Leads Industry on Production Of 1961 Models

American Motors Corp. was the "first" auto maker to begin production of 1961 model cars, Ward's Automotive Reports said.

Ward's tabulations show that American Motors built 965 new 1961 cars in June and 4,855 in

Meanwhile, Ward's said that 225 Buick 1961 Specials were built in the week ending Aug. 6 as well as 1,000 Valiants and 100 Dodge Lancers. Both the Special and the Lancer are new compacts.

Pilot production started on Aug. 1 for the 1961 Plymouth and the compact Oldsmobile F-85, another new compact, Ward's said.

During August, Ward's esti-mates that 316,800 cars will be assembled compared with 239,149 in August a year ago. Of the August total, 23% will be 1961 model cars.

The statistical agency said that U. S. car output fell off 4.7% in week ended Aug. 6. Only two Chrysler assembly lines were operating while Studebaker-Packard Corp. built no cars. U. S. car makers turned out an estimated 102,071 cars contrasted to 107,019 last week. In the same week last year, 108,240 were produced.

Would you telephone us at REctor 2-9570 or write us at 25 Park Place, New York 7?

March 25 the company's annual report stated that capital improvements during 1960-63, inclusive, have been projected to cost between \$40,000,000 and \$45,000,000. It is anticipated that a substantial proportion of this money will be forthcoming from depreciation and retained earnings. In addition, the sale of \$10,000,000 of preferred stock in 1960 is planned to supply a part of these overall capital requirements. Office—Chicago, Ill. Note— Aug. 5, 1960, it was announced 100,000 shares of \$100 par cumulative preferred stock were purchased by certain institutions. The arrangements negotiated by Blyth & Co., specified that a part of these shares were to be bought on Aug. 1, with the balance to be taken by June 30, 1961.

Alexander's Department Stores, Inc. July 6 it was reported that this Bronx (N. Y.)-based retail chain is contemplating an issue of common stock. No confirmation was available.

American Telephone & Telegraph Co. (10/25) July 20, 1960, the directors authorized a new debenture bond issue of \$250,000,000. Proceeds — For improvement and expansion of Bell Telephone services. Bobbie Brooks, Inc. July 25, 1960 the company stated in its annual report that about \$200,000 is expected to be raised by long term financing, to be applied to the \$385,000 cost of acquiring real estate adjacent to its Cleveland 14, Ohio, headquarters.

Bridgeport Gas Co. July 26, 1960 it was reported that some new financing is expected later in the year. No further details are available. Address-P. O. Box 1540, Bridgeport 1, Conn.

Brooklyn Union Gas Co. May 10 it was announced that the company plans no more financing this year, but there would be some in 1961, although the form it is to take has not as yet been determined.

* Citizens & Southern Small Business Investment Aug. 5, 1960 it was reported that the company is now contemplating a public offering of its securities. Office

Colorado Interstate Gas Co. July 28, 1960 the company reported that debt financing of \$70,000,000 is contemplated. Precise timing depends on final FPC approval. Office-Colorado Springs, Colo.

Columbia Gas System, Inc. (10/6) June 13, 1960, it was reported that the company plans to sell \$30,000,000 of debentures. Proceeds - For construction. Office-120 E. 41st St., New York City. Underwriter-To be determined by competitive bidding. Probable bidders: Merrill Lynch, Pierce, Fenner & Smith Inc.; Shields & Co.; R. W. Pressprich & Co. and Carl M. Loeb, Rhoades & Co., all of New York City. **Bids**—Expected to be received on Oct. 6.

Columbus & Southern Ohio Electric Co. June 13, 1960, it was reported that this utility plans the sale of about 200,000 shares of common stock to raise approximately \$8-\$9,000,000, with the timing set for the last quarter of this year, sometime after the November elections. Proceeds-For expansion purposes. Office -215 N. Front St., Columbus 15, Ohio.

Consolidated Edison Co. May 15 it was indicated by H. C. Forbes, Chairman, at the annual meeting of stockholders, that common stockholders may get rights to subscribe to convertible debentures or common stock in the Fall. This type of financing would be contingent upon the ability of the company to get its presently outstanding 4% debentures converted into common stock. Con Edison this year will spend about \$225,000,000 on new construction compared with \$222,000,000 in 1959 and \$189,000,000 in 1958. For the five years through 1964, Mr. Forbes estimated that the utility would spend \$1.2 billion for plant expansion. To finance the five-year program he said the company will have to issue some \$800 million of securities of one kind or another.

 Consumers Power Co. April 29 the company asked the Michigan Public Service Commission for permission to issue and sell securities with base value of \$73,101,600. The company proposes to issue and sell first mortgage bonds in the amount of \$35,000,000 maturing not earlier than 1990 for the best price obtainable but not less favorable to the company than a 51/4 % basis. The mortgage bonds are expected in the last quarter of the year, perhaps in October. The balance of the securities is being offered. See "Securities in Registration." **Proceeds**—To be used to finance the continuing expansion and improvement of the company's electric and gas service facilities in a 65-county area outside of Greater Detroit. Underwriter-To be determined by competitive bidding. Probable bidders: For bonds-Halsey, Stuart & Co. Inc.; White, Weld & Co., and Shields & Co. (jointly); Morgan Stanley & Co.; The First Boston Corp., and Harriman, Ripley & Co., Inc.

Custom Craft Industries July 13, 1960 it was reported that the company plans a regulation "A" filing sometime in mid-August. Proceeds -For general corporate purposes. Office-Miami, Fla. Underwriter - Plymouth Securities Corp., New York

Electronics International Capital Ltd. July 26, 1960 it was reported that this company, which expects to incorporate in Bermuda, is planning its initial financing to occur later in the year. Proceed: - To acquire major equity positions in large and mediumsize electronics companies outside the United States. Underwriter-Bear, Stearns & Co., New York City.

the life insurance business in the nation today.

The increase in these assets over the 15-year span we are examining has been \$72.5 billion-or an average increase of \$4.8 billion each year. Again, let me emphasize that this \$4.8 billion figure is enormous. It represents over 25% of the annual long-term institutional savings of the country.

I shall not attempt to detail all the changes shown in the Table; but I do want to mention several appliances.

of the salient trends.

cantly. During World War II, the life insurance business bought heavily in Government securities. reducing the inflationary pressures that occurred during the War. After the termination of hostilities, the industry started to liq-uidate its position in U. S. Govto seek. These securities did not provide a yield sufficient to cover policy requirements, and higher yielding investments — especially mortgages and corporate bondsbecame available in large volume. It was most unfortunate that this exchange of low yielding Governments for higher yielding mortgages and bonds was facilitated by the Federal Reserve's policy of 'pegging" the price of U.S. Governments at par. While the life insurance business was a direct beneficiary of this benighted "pegging" operation, the industry, and the entire nation as well, was seriously injured by the depreciation in the purchasing power of the dollar which this monetization of the Federal debt brought about.

Corporate Bond Investments

I would like next to call your attention to the corporate bond lion. This represents a tremendous ownership in this country. contribution to the financing of

proceeds from these bonds have been used to purchase diesel engines, box cars, electric power plants, factories to make all kinds of products. The funds have been used to lay pipelines that supply us with gasoline and natural gas; they have been used to supply additional working capital to help industry carry more inventory and receivables; they have been used to supply additional capital to finance companies which aid people in buying more automobiles and

WASHINGTON AND YOU

BEHIND-THE-SCENES INTERPRETATIONS FROM THE NATION'S CAPITAL

WASHINGTON, D. C. — In the Nation's Capital, Congress was reconvening in a highly charged political atmosphere that should never have been called unless a grave national or international atmosphere existed.

The post political conventions session finds the unprecedented spectacle of three of the four Presidential and Vice-Presidential candidates facing each other in a chamber that was never intended to be used as a forum for Presidential campaigns.

The post convention session of Congress might come up with surprise and pass some good bills. However, if it turns out to be a flop, the responsibility must rest upon the Democrats, and Senate Majority Leader Lyndon B. Johnson and House Speaker Sam Rayburn in particular.

It was these two legislative leaders from Texas who marked time for months insofar as legislative progress is concerned. Then all of a sudden they discovered there was a lot of good election year legislation that needed attention, but there was just not enough time left to act upon the proposals before the big political conventions.

As the law-makers trickled back to Capitol Hill from Honolulu to Miami and from Portland, Ore., to Portland, Me., there were a lot of little things taking place out in the various states that were important to the people. To them it was more important than the round of political pop-offs in Washington.

Significant Items From North Carolina

Perhaps North Carolina last week was a good example of summertime Americana in a state with its beautiful mountains, the seacoast and the Piedmont section. Late this month and in early September the chant of the tobacco auctioneer will be heard. This means a steady flow of cash to the tobacco growers and others as they are rewarded for their labors.

It is possible that some things that took place in North Carolina last week and will take place in the weeks ahead will all add up to something significant.

Governor Luther H. Hodges, the 64th elected Chief Executive of North Carolina, went out and helped to dedicate a poultry plant at Rose Hill in Duplin County, one of the state's 100 counties. Last year Duplin Country produced 17 million broilers and more than 55 million eggs that found a market all the way to New York City.

After telling the Eastern North Carolina audience that the "really significant and fascinating thing about what has been accomplished here is that the same thing could have been accomplished in dozens of counties throughout the state," the Governor went on to say that he was not proposing that the Eastern part of his state be turned into one big chicken yard, but he declared that he was merely pointing out what could be done by people with courage and hard work.

State's Gubernatorial Contest

Governor Hodges, wearing a white carnation in the lapel of his coat, a few hours later stepped out of a black limousine

at the capitol with its well-kept lawns and more than 50 varieties of trees. The kindly Chief Executive of the Tar Heel State stopped and chatted with a couple of friends and invited them to his office, but his office already had numerous people waiting for him including Terry Sanford, the Democratic guber natorial nominee, who is expected to succeed him next January.

Attorney Sanford, as the governor nominee, made front-page news out at the Democratic convention at Los Angeles when he came out flatly two days before the convention opened for John F. Kennedy as the Democratic nominee. This sort of stunned some of the North Carolina Congressional members, who like most Southern Congressmen favored Lyndon Johnston over Kennedy.

Considerable opposition seemingly has cropped up against Mr. Sanford and there may be a big write-in vote for another Democratic candidate at the general election in November. The Republican candidate will also get a substantial vote.

Religious Denomination Opposes Kennedy

But perhaps the most significant political news in the South also took place in North Carolina, but it made no front pages. It may not have gotten beyond the Carolinas.

At Gastonia, N. C., 40 Baptist clergymen from Gaston and Mecklenburg County churches had a meeting and blue-printed plans designed to defeat Mr. Sanford and John Kennedy next

Dr. Ward V. Barr, Minister of the Host First Baptist Church of Gastonia, probably spoke for a majority of the Ministers, when he declared that he would support North Carolina Republican gubernatorial candidate Robert Gavin for the Governorship and Vice-President Richard M. Nixon for the Presidency.

"I have stated many times, and I repeat, I fear Catholicism much more than I do communism," the Rev. Dr. Barr was quoted as saying in a dispatch printed in the Raleigh News and Observer.

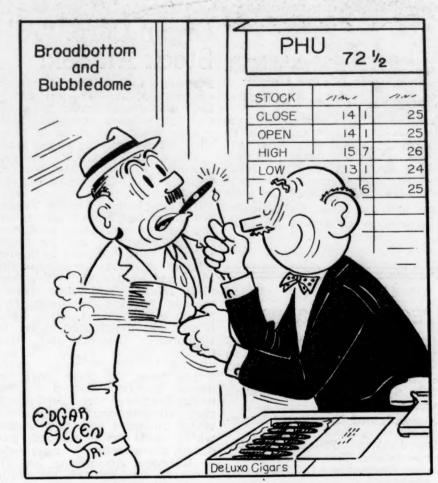

Of course, this meeting of clergyman does not necessarily mean that North Carolina will follow the course it took in 1928 when it voted for Herbert Hoover, the Republican, in preference to Governor Alfred E. Smith of New York, a Catholic. There were other things involved in North Carolina that year besides the question of religion of Governor Smith.

Nevertheless, that was the last time and the only time the state has gone Republican in a Presidential election.

Although the opposition to the Kennedy-Johnson ticket may increase, as of now some qualified observers unhesitatingly predict that North Carolina will be in the Kennedy column in November.

State's Fiscal Status Laudable

There were other bits of Americana taking place North Carolina last week. The Tar Heel State, with its growing number of industries, is in better financial condition than the Federal Government in Washington. The state under the leadership of Governor Hodges ended its 1959-60 fiscal year with a total surplus of \$51,700,000.

"All right—All right!—How many points did that stock you recommended drop?"

The state's 40,000 school teachers are going to get a substantial slice of the surplus. Incidentally, of the 40,000 teachers, 10,000 are members of the Negro race. There are more Negro teachers in North Carolina for instance than there are in any other state and more than in New York, Pennsylvania and two or three other Northeastern states combined.

Of course, there are more Negroes in North Carolina than any other state, although Mississippi has the largest percentage. There is token integration in seven of North Carolina's school districts. All have been done voluntarily. There has been no integration by court order. Integration is taking place gradually.

In North Carolina, as in most states, there will be more children, more classrooms, more teachers and more buildings than ever before this fall. And in the institutions of higher learning, most of them just a short drive apart, they are preparing for the biggest collegiate enrollment of all time. These institutions include the University of North Carolina, North Carolina State, Wake Forest and Duke, among others.

The chant of the tobacco pour into the big football stadia is not far off.

[This column is intended to repretation from the nation's Capital the "Chronicle's" own views.]
